**No Thru Road Sep 26 2020 Moto-journalist
Clement Salvadori has been riding
motorcycles since the age of 15 and traveling
all of his life, accumulating well over a million
miles in the saddle across more than 70
countries on six continents. No Thru Road
covers 30 different trips he has taken, to
places like Afghanistan and Zimbabwe, since
his first ride through western Europe in 1957.
The stories are all original, though the subject
may have appeared as a magazine article in a
very different rendition. The book will appeal
to adventure-travel enthusiasts and to
motorcyclists and travelers of all persuasions.
Adventurous riders will thoroughly appreciate
the book, as in the description of kick-starting
a 500cc single - never easy to do - at 17,200
feet in the Tibetan Himalayas. Or going up to
Cape Tribulation in Australia's Queensland in
1974 when the only access was via a once-a-
week ferry across the Daintree River. Or riding
a bike to Pamplona, Spain, in 1960 in order to
run with the bulls. Activists who want to get**

on their motorcycles and ride down into Mexico's Copper Canyon will enjoy the book, as will the arm-chair traveler who is happy reading about traveling from Peru's Great Ica Desert over the Andes Mountains to the Amazon basin. Clement's adventures are arranged so the reader can open the book to any chapter, be it India, Nepal, the Sahara, New Zealand or Viet Nam, and not have to worry about following a thread. Lots of adventures, lots of good reading, lots of photos and illustrations. This book promises excellent entertainment and a glimpse into life as a moto-journalist.

Race Tech's Motorcycle Suspension Bible Aug 06 2021 Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. Dreaming Of Jupiter Oct 20 2022 Ted Simon is the author of the classic travel book JUPITER'S TRAVELS. It documents his four-year journey round the world by motorbike, travelling through Europe, Africa, South and North

America, and Asia. A number one bestseller in the late 1970s, it is still regarded as one of the greatest motorcycle books - indeed, one of the greatest travel books - ever written. In 2001, at the age of 69, Ted Simon decided to retrace his journey, and DREAMING OF JUPITER is the result. It took him two and a half years - during which time he revisited all the countries he had travelled through in the 1970s. He found much had changed, and he reflects upon the increased poverty, political upheavals, environmental issues and indeed the changes in himself. But ultimately, DREAMING OF JUPITER is a hugely inspiring read with a positive message at its heart - that even at the age of 70 you can still set off on an adventure, and be surprised and excited by what life throws at you along the way.

The Upper Half of the Motorcycle Oct 28 2020

Bernt Spiegel's The Upper Half of the Motorcycle was a best-selling motorcycling book in its original German with multiple editions and printings to its credit. Now translated into English, its provocative message is available to a wider audience. Spiegel's metaphor considers the rider and the motorcycle as a single unit, the rider being the upper half. Taking a multidisciplinary approach, the author draws on anthropology, psychology, biology, physics, and other disciplines to analyze the theory and function of the man-machine unit. Motorcycle riding is seen as a junction where people have created machines for personal transport and then become so adept at using them that the machine becomes like an extension of the rider themselves. The ultimate goal for riders is the integration of the man-machine interface and subsequent skill development to the point of virtuosity. Spiegel considers the various aspects of motorcycle riding that must be understood, practiced, and mastered before virtuosity can be attained. Many anecdotes, supplementary material, and in-depth treatment of specialized topics is contained in sidebars and footnotes. Numerous diagrams and photographs illustrate the book's principles

allowing the reader to consider and develop their riding skill set.

Around the World on a Motorcycle Nov 16 2019 The year was 1928 when two young Hungarians decided to travel around the world on a Harley-Davidson motorcycle with sidecar. Like Robert Fulton, whose circumnavigation of the globe is chronicled in his popular 1937 book *One Man Caravan*, Sulkowsky thought his was the first around-the-world journey on a motorcycle. This account of his trip with friend Gyula Bartha gives a very clear-eyed view of the world in the 1930s -- a world where the colonizing influence of Europe had affected much of Africa and Asia but not all. The two experienced the riches of sultans, witnessed remote cultures and extreme poverty in far-flung villages, travelled through wilderness with the ever-present danger of wild animals, and traversed roads of all descriptions. They dealt with mud, sand, extreme heat and cold, and rivers where the motorcycle had to be taken apart to cross in a small boat. This intelligent and engaging book, now in a paperback edition, offers a unique world view between the World Wars, flavored by the great diversity of cultures and the wide variety of human life that exists on the planet.

Riding in the Zone Sep 19 2022 Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the

factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.
