The Firm, the Market, and the Law Mar 27 2020 Few other economists have been read and cited as often as R.H. Coase has been, even though, as he admits, "most economists have a different way of looking at economic problems and do not share my conception of the nature of our subject." Coase's particular interest has been that part of economic theory that deals with firms, industries, and markets—what is known as price theory or microeconomics. He has always urged his fellow economists to examine the foundations on which their theory exists, and this volume collects some of his classic articles probing those very foundations. "The Nature of the Firm" (1937) introduced the then-revolutionary concept of transaction costs into economic theory. "The Problem of Social Cost" (1960) further developed this concept, emphasizing the effect of the law on the working of the economic system. The remaining papers and new introductory essay clarify and extend Coase's arguments and address his critics. "These essays bear rereading. Coase's careful attention to actual institutions not only offers deep insight into economics but also provides the best argument for Coase's methodological position. The clarity of the exposition and the elegance of the style also make them a pleasure to read and a model worthy of emulation."—Lewis A. Kornhauser, *Journal of Economic Literature* Ronald H. Coase was awarded the Nobel Prize in Economic Science in 1991.

Landmark Essays on Writing Centers Dec 29 2022 This collection introduces the reader to the ideas that have shaped writing center theory and practice. The essays have been selected not only for the insight they offer into issues but also for their contributions to writing center scholarship. These papers help to chart the legitimation of writing centers by providing both a history and an examination of the philosophies, praxis, and politics that have defined this emerging field. They demonstrate the ways a clearer profile of the discipline has emerged from the research and reflection of writers, like those represented here. This volume charts the emergence of writing centers and the growing recognition of their contributions, roles, and importance. As a nascent discipline, writing centers reflect the concerns with marginality and with finding a respected place in the academy that characterize any new field of academic inquiry, practice, and research. Concomitantly, professionals in these fields seek standing within the academy and a way of defining and validating their contributions to the educational process. Contemporary writing center theorists look to interdisciplinary and multidisciplinary investigations to interpret the work they do and to clarify their aims to the academy at large. Their work employs a variety of philosophical perspectives -- ranging from sociolinguistics to psychoanalytic theory -- to show the complex nature and potential of writing center interactions. The idea has now become the multidimensional realities of the writing center within the academy and within society as a whole. What its role will be in future redefinitions of the educational process, how that role will be negotiated and evaluated, and how professionals will shape educational values will constitute the future landmark directions and essays on writing center theory and practice.

The Federalist Papers, the Ideas That Forged the American Constitution Jul 24 2022 This compact illustrated book selects the best essays from the most important

American contribution to the literature of political science and constitutional government, *The Federalist*. These essays appeared first in 1787-88 as a series of articles in New York City's newspapers to explain and defend the proposed Constitution of the United States. Ever since, they have been read and studied around the world for their examination of the challenges of constitution-making and the innovative features of the Constitution. The authors of *The Federalist* were three of the greatest politicians and political thinkers in U.S. history: Alexander Hamilton and John Jay of New York, and James Madison of Virginia. Hamilton and Madison were delegates to the Federal Convention, which framed the Constitution; Jay helped negotiate the Treaty of Paris of 1783, which ended the American Revolution and won British recognition of American independence. The three men wrote under a pen-name, Publius, after the Roman Senator who led his countrymen in creating the government of the Roman Republic. The editor, R. B. Bernstein, is a lecturer in political science at City College of New York and author of *Thomas Jefferson and The Founding Fathers: A Very Short Introduction*.

The Constitutionalist Revolution Jan 06 2021 An innovative account of English constitutional ideas from the mid-fifteenth century to the time of Charles I, showing how the emergence of grand claims for common law, the country's strange unwritten legal system, shaped England's cultural development. Though he does not neglect the role of narrowly religious disagreements, Cromartie brings out the way that 'religious' and 'secular' values came to be closely intertwined: to the majority of Charles's subjects, the rights of the clergy and the king were legal rights; the institutional structure of Church and state was an expression of monarchical power, obedience to the king and to the law was a religious duty. A proper understanding of this cluster of ideas reveals why Charles found England so difficult to control and why both parties in the civil war believed that they were fighting for established institutions.

Criminological Thoughts and the African Contribution to its Development Oct 15 2021 Academic Paper from the year 2021 in the subject Law - Criminal process, Criminology, Law Enforcement, grade: 4.0, University of Lagos, course: Law, language: English, abstract: This paper sets out to look at the African society before the influx of imperial powers and how their crime and punishment equation had emerged and was implemented in the society before it was eventually swept away by her New Masters. Criminological ideas are often credited as western creation. This is a position held by many criminology writers and students alike globally, which by so doing denies Africa of a well-deserved acknowledgment of her contributions to criminological ideas. The African ideas have been erroneously regarded as "new ideas" by western nations. It is sad to observe that Africans themselves are contributors to this lack of recognition of their ideas. Africans considered their ideas as belonging to the trash bin of history, as they embrace the criminological ideas of Imperial powers. Unfortunately, the ideas which they rejected were refined by Europeans and sold to them as new wisdom.

Scholarly Writing Feb 28 2023 In addition to a standard first-year legal writing curriculum, most law schools now require upperlevel students to write a sophisticated legal research paper on a topic of their choice. Students often struggle through the scholarly writing process, from finding a topic to polishing a final paper, and many never fully develop and defend a thesis. *Scholarly Writing: Ideas, Examples, and Execution* offers a lifeline to students, guiding them through the process of constructing their legal research papers from start to finish. With over 10 years combined experience teaching scholarly writing to J.D. and LL.M. students, the authors identify common roadblocks for student writers, and offer advice and techniques for how to successfully overcome these roadblocks. The book walks students through a five-step process for researching and writing scholarly papers and follows five published student papers from idea to final execution as a method of illustrating the principles advocated in the text. This example-based approach sets this book apart from others; the authors not only tell students how to approach their papers, but through annotated excerpts of example papers, they show students how to approach their papers. The book includes up-to-date information about legal research and organizational tools. It also includes "bright ideas" that supplement the text with ideas and examples for student writers. The text may be used as either a required text for a course in Scholarly Legal Writing or a companion guide for students working on scholarly legal writing projects independently.

Of the Law of Nature and Nations Jan 24 2020 In *Of the Law of Nature and Nations*, Pufendorf provided a comprehensive system of society, law, and government

based on a theory of human nature. Eschewing contemporary theological ideas of human perfection and other-worldly beatitude, he founded his natural law on the need for sociability in this world. While paying great respect to Grotius as the founder of a modern, enlightened natural law, Pufendorf criticized his remaining "scholasticism." Similarly, he learned from Hobbes but rejected the reduction of natural law to individual self-interest. Pufendorf wanted to transform natural law by getting rid of its metaphysical foundations, but he retained its function as a moral basis for civil law and the state. Of the Law of Nature and Nations was Pufendorf's magnum opus. Despite its enormous size, the work was translated into nine languages. Together with the shorter textbook version, The Whole Duty of Man--published in thirteen languages--Pufendorf's work influenced generations of students across Europe and America. Samuel Pufendorf (1632-1694) was one of the most important figures in early-modern political thought. An exact contemporary of Locke and Spinoza, he transformed the natural law theories of Grotius and Hobbes, developed striking ideas of toleration and of the relationship between church and state, and wrote extensive political histories and analyses of the constitution of the German empire. Basil Kennett (1674-1715) was an antiquary, translator, and Anglican clergyman who led a team effort in translating Pufendorf's great work. Knud Haakonssen is Professor of Intellectual History at the University of Sussex, England.

Collected Legal Papers Jan 30 2023 A valuable compilation, this volume contains Holmes' most famous speeches and papers from 1885 to 1918. Its publication in 1920 was an important event in the legal community, and it was reviewed with great enthusiasm in the major journals and law reviews. Roscoe Pound offered the finest assessment in "Judge Holmes's Contributions to the Science of Law," an essay-review from 1921 that analyzed the place of these writings in the development of American law from the 1880s to the 1920: "Rereading them consecutively in their new form and remembering the dates of their original publication, one can but see that their author has done more than lead American juristic thought of the present generation. Above all others he has shaped the methods and ideas that are characteristic of the present as distinguished from the immediate past." Harvard Law Review 34 (1920-1921):449. ". . . Collected Legal Essays is a good vertical section of the mind of that judge who beyond any other of his generation has impressed his ideas on the structure and course of the law."- Learned Hand. Oliver Wendell Holmes, Jr. [1841-1935] served as Chief Justice of the Supreme Court of the United States from 1902 to 1932. Known as "The Great Dissenter" on the Court because of the brilliant legal reasoning found in his written opinions, he often differed in opinion from Theodore Roosevelt, who had appointed him to the bench. As a young man he attended Harvard College, served in the American Civil War among the "Harvard Regiment" and was seriously wounded. After the war he attended, and later taught at Harvard Law School before his appointment to the Supreme Judicial Court of Massachusetts. Well known for his legal philosophy espoused here and in The Common Law, Holmes proposed that the law was not a science founded on abstract universal principles but a body of practices that responded to particular situations. The Law School Years May 10 2021 The Law School Survey of Student Engagement (LSSSE) documents dimensions of quality in legal education and provides information about law student participation in effective educational activities that law schools and other organizations can use to improve student learning. This paper presents findings from the second LSSSE. Promising findings include: (1) Students who frequently received prompt oral or written feedback from faculty were more positive about their overall law school experience; (2) Nine in 10 students said their law school, to a substantial degree ("quite a bit" or "very much"), emphasized studying and spending time on academic work; (3) More than four-fifths of law students reported their classes emphasized to a substantial degree applying theories or concepts to practical problems; (4) About three-quarters of law students frequently ("very often" or "often") integrated ideas from various sources into papers or projects; (5) Part-time and full-time law students did not differ in terms of how they perceived the degree to which the law school environment supports their academic and social needs; (6) More than one-half of students frequently ("often" or "very often") had serious conversations with students from different racial and ethnic backgrounds; (7) Students who had more experiences with diversity in law school were more likely to report they benefited from law school and were more satisfied with their overall law school experience; (8) First-year law students who were satisfied with academic advising were more likely to perceive the law school environment as supportive and were more satisfied with their overall law school experience; and (9) Students who were satisfied with career counseling and job search assistance gained more in acquiring work-related knowledge and were more likely to have indicated they would attend the same law school if they could start over again. Disappointing findings include: (1) One-fourth (25%) of graduating law students (full-time 3L and part-time 4L) frequently came to class unprepared, compared with only seven percent of 1Ls; (2) About one in six students "never" received prompt written or oral feedback from faculty members; (3) About two-fifths of law students spent "no time" on cocurricular activities; (4) While the proportion of students seeking career counseling and job search help increased each year of law school, satisfaction with these services generally decreased; (5) About one-third (36%) of 1L students who sought personal counseling from their law school were "unsatisfied" or "very unsatisfied" with the counseling they received; (6) Almost one-half of students said their school did very little to help them cope with their nonschool activities (family, work, etc.); (7) International students viewed their relationships with classmates as less friendly and supportive than their American counterparts; and (8) The nine out of 10 JD students who incur debt to attend law school indicated they will owe more than \$77,000 when they graduate. (Contains 7 figures and 5 tables.) [For "Student Engagement in Law Schools: A First Look. Annual Survey Results, 2004," see ED528392.].

Tax Treaties: Building Bridges between Law and Economics Nov 03 2020 In this book experts from the field of economics take a different view of tax treaty issues than experts from the field of law. In order to encourage the much needed communication between these two groups, a cross-disciplinary conference was held to discuss selected tax treaty issues from both a legal and economic perspective. Twenty-five conference papers on eight topics were prepared by lawyers and economists. The

papers on legal issues were presented and discussed by economists, and vice versa. The interdisciplinary focus of the conference not only allowed an exchange of knowledge between two groups who think differently about similar issues, but also made it possible to better grasp the impact of the thinking of one group on the areas of interest to the other group. The outcome of the conference is reflected in this book. By showing the legal and the economic approaches to an issue, this book improves the general understanding of the two disciplines and demonstrates how the decisions in one discipline may influence the other discipline and its concepts. Twenty-two contributions are included, written by the most distinguished academics, practitioners and representatives of several international tax administrations and both tax and economic institutions.

The Idea of Labour Law Oct 03 2020 Labour law is widely considered to be in crisis by scholars of the field. This crisis has an obvious external dimension - labour law is attacked for impeding efficiency, flexibility, and development; vilified for reducing employment and for favouring already well placed employees over less fortunate ones; and discredited for failing to cover the most vulnerable workers and workers in the "informal sector". These are just some of the external challenges to labour law. There is also an internal challenge, as labour lawyers themselves increasingly question whether their discipline is conceptually coherent, relevant to the new empirical realities of the world of work, and normatively salient in the world as we now know it. This book responds to such fundamental challenges by asking the most fundamental questions: What is labour law for? How can it be justified? And what are the normative premises on which reforms should be based? There has been growing interest in such questions in recent years. In this volume the contributors seek to take this body of scholarship seriously and also to move it forward. Its aim is to provide, if not answers which satisfy everyone, intellectually nourishing food for thought for those interested in understanding, explaining and interpreting labour laws - whether they are scholars, practitioners, judges, policy-makers, or workers and employers.

The Federalist Papers Jun 22 2022 This authoritative edition of the complete texts of the Federalist Papers, the Articles of Confederation, the U.S. Constitution, and the Amendments to the U.S. Constitution features supporting essays in which leading scholars provide historical context and analysis. An introduction by Ian Shapiro offers an overview of the publication of the Federalist Papers and their importance. In three additional essays, John Dunn explores the composition of the Federalist Papers and the conflicting agendas of its authors; Eileen Hunt Botting explains how early advocates of women's rights, most prominently Mercy Otis Warren, Judith Sargent Murray, and Charles Brockden Brown, responded to the Federalist-Antifederalist debates; and Donald Horowitz discusses the Federalist Papers from the perspective of recent experiments with democracy and constitution-making around the world. These essays both illuminate the original texts and encourage active engagement with them.

Scholarly Writing for Law Students Feb 04 2021 This book fills an important niche in legal-writing literature by teaching law students how to write scholarly papers for seminars, law reviews and law-review competitions. It helps novices and even more experienced scholars to write papers with a minimum of anxiety. Employing a process theory of writing, the text first describes the enterprise of scholarly writing, and then discusses techniques for brainstorming, researching, drafting, and revising for substance and style. There are also chapters on footnote practice, plagiarism, law review editing, and publication. Appendices provide a sample law-review competition paper, answers to in-text exercises, and sample syllabi for scholarly writing courses.

A Powers-Based Approach to the Protection of Ideas Oct 27 2022 This paper provides a unified account of idea-submission law in terms of legal powers. It argues that the duty upon a recipient of a novel and original idea results from the exercise of a legal power that the law confers on originators in order to enable them to share their ideas selectively. This paper contributes to our understanding of idea-submission law and to private law theory more generally in a number of ways that have not been addressed in the literature. First, it systematically reveals the lack of fit between the case law and conventional legal theories for the protection of ideas. Second, it provides an account that accommodates the core criteria for the protection of ideas while illuminating the interests and values served by this area of the law. Finally, this paper articulates an important principle at work in Anglo-American law that limits the scope of an originator's power to control disclosure: the imposition of special duties is appropriate only where there is some minimum foundation of voluntariness. Anglo-American law is reluctant to recognize duties that inescapably flow from unavoidable positions, such as the duty to rescue, whereas it accepts a category of duties I call positional duties: duties that inescapably flow from avoidable positions. I place the duty not to use or disclose another's novel and original idea in this category of duties.
