Math is everywhere when you're traveling! See who's on the move inside this book—and how we need math to finish the trip! You'll need your math smarts to calculate time, distance, and speed, choose the best route and type of transit, figure out time zones, plan travel expenses; and more. It all adds up to a lot of fun! From the beloved author of the No. 1 Ladies' Detective Agency series comes a beautiful and transporting volume of poems brimming with warmth and humanity. What matters most in life? For Alexander McCall Smith, it is friendship, love, and travel—the themes found throughout his work that have made him a cherished writer the world over. This first collection of McCall Smith's poems reflects on these topics with all his characteristic wit and charm. In this delightful work, McCall Smith takes us on a captivating journey from Africa to Greece, London, Canada, Mumbai, and back home to Scotland, celebrating people, places, animals, and books. There are moments of sweeping insight and soaring feeling, and moments that will have you laughing along as they subtly shift your worldview. This inimitable writer shares his distinctively astute and good-natured observations on life, love, and beauty, reminding us of the deep satisfaction that can be found when we open ourselves up to the world with our whole heart, and watch as it takes on a kinder and gentler shape. "History of the American society of mechanical engineers. Preliminary report of the committee on Society history," issued from time to time, beginning with v. 30, Feb. 1908. ? The ideal Walking Journal for keeping records of particular walks. Finish your 100 walks challenge, by planing short walks at a gentle pace, you will find by keeping this journal that your fitness will improve and the walks will get progressively easier. ? The 102-page paperback book is a matte book and bound with book industry binding, don't worry, the lines are spacious and let you write comfortably, and The quality crisp white paper minimizes ink bleed-through and is perfect for pen or pencil users. ? Features : Page to write the name of the owner Design: matte cover design, perfect binding 102 pages With Prompts (6.69 x9.61)Inch White Paper (16.99 x 24.41 cm) ? Page Details: Walking Numer Date Start Time End Time Walk Duration Walk Distance Description of the walk route Companion(s) Weather Conditions Meet anyone or eventful memory How do you feel after this walk and more ... This is a perfect gift for loved ones that are attempting to improve their health and life. ? Don't forget to click the "Add to Basket" button to get your copy! This book conducts effective research on data-driven Structural Health Monitoring (SHM), and accordingly presents many novel feature extraction methods by time series analysis and signal processing, to extract reliable damage sensitive features from vibration responses. In this regard, some limitations of time series modeling are dealt with. For decision-making, innovative distance-based novelty detection techniques are presented to detect, locate, and quantify different damage scenarios. The performance of the presented methods is demonstrated via laboratory and full-scale structures along with several comparative studies. The main target audience of the book includes scholars, graduate students working on SHM via statistical pattern recognition in terms of feature extraction and classification for damage diagnosis under environmental and operational variations; it would also be beneficial for practicing engineers whose work involves these topics. Traditional forms of collaboration are not sufficient for competing effectively in the

more complex and dynamic environment of today's business world. Face-to-face meetings between people of similar backgrounds have given way to increasingly complex working relationships. Organizations must be able to gain rapid access to knowledgeable people to meet constantly changing conditions and demands. More fluid, flexible, and easily reconfigurable collaborative relationships are necessary to produce the innovations that can make or break organizations<sup>3</sup>/<sub>4</sub> even entire industries<sup>3</sup>/<sub>4</sub> and provide the opportunities that attract the talented and motivated employees who will make the difference between success and failure. *Business Without Boundaries* helps managers address these challenges. The authors explore a number of wide-ranging, real-world cases to identify hands-on principles for successful collaboration. They offer managers and executives practical steps and tools for creating, facilitating, and supporting complex collaborations throughout their organizations. And they explain how to "team" across boundaries in the new global economy. The recommendations are specific enough to apply to particular forms of complex collaboration (for example supply chains, global product development teams, interorganizational alliances) but general enough to apply to new forms that have yet to emerge.

*Elektrische Traktion*. Get on the right track and speed past your cycling goals by getting this perfect companion to any cycling training program! Whether you're aiming for faster time, longer distance, or just to have more fun, this *Cycling Record Keeping Log Book* supports your journey as a cyclist. This cycling planner contains everything needed for a cyclist, from beginner to professional and for everyone in between. We understand that each individual will have different needs, so feel free to use this book how best suits you! Keeping track of your rides is a great way to measure improvement and continually motivate yourself. This will keep track of all the details of your rides and training with having your goals each month, routes, distance and calories burnt. Extend distances, explore places, have fun with your bike and become the best. This logbook is designed specifically to track EVERYTHING to do with cycling and makes a great gift for a loved one (or yourself!). Buy one for yourself or anyone you know how is a cycling enthusiast! Features: Beautifully-Designed, Premium Cover Handy 6"x9" Size Bright White Interior Stock Paper 107 Pages Will make a Great Gift for family, friends and loved ones on any occasion! To see more logbooks, planner, or notebooks like this, be sure to check out our other listings by clicking on the author's name just below the title of this planner.

A proliferation of new technologies has lulled many into thinking that we actually have to think less about how we communicate. In fact, communicating and collaborating across time, distance, and cultures has never been more complex or difficult. Written as a series of bulleted tips drawn from client experiences and best practices, *Leading Effective Virtual Teams: Overcoming Time and Distance to Achieve Exceptional Results* presents practical tips to help leaders engage and motivate their geographically dispersed project team members. If you're a leader of any type of virtual team and want to help your team members collaborate more effectively, then buy this book. You will learn how to: Build trust and cultivate relationships, virtually, across your team Design and facilitate virtual meetings that are focused and engaging Influence without authority Motivate and galvanize a virtual team for top performance Blend asynchronous and synchronous communications for better virtual collaboration Navigate cross-cultural and generational differences in the absence of vital visual cues Assess skills, strengths, aptitudes, and preferences from afar Handle other tough issues that can trip up virtual teams The ideas in this book are based on Nancy Settle-Murphy's decades of experience working as a change management consultant, facilitator, and trainer for project teams around the world. Designed to be read section by section in any order, this book shares approaches and techniques to help you address some of the toughest challenges virtual team leaders face, including keeping team members engaged from afar.

Patients are dying at St. Raphael's Hospital, and a young, meddling x-ray tech is the only person standing in the way of a corrupt healthcare system in this radioactive medical thriller. Claire Neuman uses her radiographic skills to detect disease. When she uncovers a mysterious trend of surgical errors, Claire's powers of detection are the only thing that can save her patients. This nuclear bomb of a novel offers a suspense-filled adventure in x-ray technology and the horrors of patient care gone wrong. What Amazon readers are saying about *Time, Distance, and Shielding*: ?????? 'Loved this book. It combines all of the things I enjoy, radiology, teaching, and thrillers. I highly recommend to any X-Ray tech or tech in training. The suspense kept me interested from start to finish.' ?????? 'I know these people, having worked with techs for 42 years. This story really strikes a chord, not only for people who work in radiology. Many dedicated workers in hospitals who work their tails off but get little respect will relate. The story is beautifully written. In the middle of what one might start to think are filler paragraphs, there are many great lines such as "Surgical teams often arrive at that place where they can finish each other's sentences and marriages..." ?????? 'Very good book regarding radiology world. Keep my interest peaked. Definitely will be waiting for the second book. Can't wait.' A distinguished mathematician traces the history of science, illustrating philosophy's ongoing role, explaining technology's erosion of the rapport between the two fields, and offering suggestions for their reunion. 1962 edition. Do you like to play games outside? Have you ever played the egg relay or ball balance? Does your school hold a field day where you can do just that? In this book you will learn about distance, rate, and time while playing these and other field day games along with middle school students. Additional mathematical concepts include proportions, ratios, and cross products. Ready, set, go! "This book looks at solutions that provide the best fits of distance learning technologies for the teacher and learner presented by sharing teacher experiences in information technology education"--Provided by publisher. Major survey offers comprehensive, coherent discussions of analytic geometry, algebra, differential equations, calculus of variations, functions of a complex variable, prime numbers, linear and non-Euclidean geometry, topology, functional analysis, more. 1963 edition. In this inspirational and

unflinchingly honest memoir, acclaimed author Reyna Grande describes her childhood torn between the United States and Mexico, and shines a light on the experiences, fears, and hopes of those who choose to make the harrowing journey across the border. Reyna Grande vividly brings to life her tumultuous early years in this “compelling...unvarnished, resonant” (BookPage) story of a childhood spent torn between two parents and two countries. As her parents make the dangerous trek across the Mexican border to “El Otro Lado” (The Other Side) in pursuit of the American dream, Reyna and her siblings are forced into the already overburdened household of their stern grandmother. When their mother at last returns, Reyna prepares for her own journey to “El Otro Lado” to live with the man who has haunted her imagination for years, her long-absent father. Funny, heartbreaking, and lyrical, *The Distance Between Us* poignantly captures the confusion and contradictions of childhood, reminding us that the joys and sorrows we experience are imprinted on the heart forever, calling out to us of those places we first called home. Also available in Spanish as *La distancia entre nosotros*. Time and the literary: the immediacy of information technology has supposedly annihilated both. Email, cell phones, satellite broadcasting seem to have ended the long-standing tradition of encoding our experience of time through writing. Paul de Man's seminal essay "Literary History and Literary Modernity" and newly commissioned essays on everything from the human genome to grammatical tenses argue, however that the literary constantly reconstructs our understanding of time. From eleventh-century France or a science-fiction future, *Time and the Literary* shows how these two concepts have been and will continue to influence each other. Over 450 sample speed, distance and time test questions.
