The Real Toy Story Nov 22 2022 The American toy business is massive, world dominating, cutthroat, exciting, and increasingly willing to sacrifice our kids in its frantic rush for profit. And yet, for all its rapaciousness, the industry is in the business of delighting and fascinating our children. Toys are one of the most emotive subjects in the world. We all remember our own toys; we care desperately about those we choose for our kids,

knowing these objects help shape children's lives. They are also a constantly newsworthy item: every Christmas, which toys are hot -- and the scramble by parents to grab them before the stores are empty -- is front-page and TV bulletin news. *The Real Toy Story* tells the tales of these toys and of the vast, world-dominating \$22 billion American industry that creates them. The rewards for success are enormous: a top toy can earn billions -- H. Ty Warner shot into Forbes's World's Richest People list with his creation of Beanie Babies. The price of failure is just as huge -- the battlefield is littered with the corpses of once-successful toy companies whose multimillion-dollar gambles did not pay off. It is a world of contrasts. *The Real Toy Story* looks at both sides: at Slinky, Elmo, Barbie, Transformers, and their creators, but also at the dark side of an industry that leads the way in cold-blooded marketing targeted at children. Parents will want to learn about how this seemingly benign industry exploits, sometimes surreptitiously, the many new media: cable television, the internet, CD-ROMs, sometimes even invading the playgrounds to peddle their wares to unsuspecting young people. Perhaps more disturbingly, this hard-hitting book examines the vast gap between the cuddly image of toys and how almost all toys destined for America are actually produced in China under sweatshop conditions. Today the toy industry is in the midst of rapid change. Tapping into the concern millions of adults have about the toys they choose for the children in their lives, this riveting exposé is essential reading for everyone who cares about kids.

Memory Drawing May 16 2022 From the Introduction: If you think about it, all life drawing and painting is at some point being done from the artist's memory, even if that memory is only a few seconds old. Every time the artist takes their eyes off of the model or scene and looks at their paper or canvas, their visual memory is involved. What if that artist's visual memory was highly trained? That artist might need the model for a shorter period of time, or she might have a more productive time when the model is in pose. He might be better at painting all of the fleeting effects that nature throws at us when we are landscape painting en plein air. Although I encourage you to consistently engage in memory-drawing practice, it should not supplant your regular art exercises. Memory-drawing ought to be done in addition to your regular art training, not instead of it. In a perfect world it would be integrated into traditional arts instruction, but the reality is that you will most likely be training your visual memory on your own. *Memory Drawing: Perceptual Training and Recall* exists to guide you in doing just that. It will also help you improve your abilities to remember fleeting effects, seize

essentials, and even enhance your imagination.

Power and Care Jun 17 2022 *Leading thinkers from a range of disciplines discuss the compatibility of power and care, in conversation with the Dalai Lama. For more than thirty years, the Dalai Lama has been in dialogue with thinkers from a range of disciplines, helping to support pathways for knowledge to increase human wellbeing and compassion. These conversations, which began as private meetings, are now part of the Mind & Life Institute and Mind & Life Europe. This book documents a recent Mind & Life Institute dialogue with the Dalai Lama and others on two fundamental forces: power and care—power over and care for others in human societies. The notion of power is essentially neutral; power can be used to benefit others or to harm them, to build or to destroy. Care, on the other hand, is not a neutral force; it aims at increasing the wellbeing of others. Power and care are not incompatible: power, imbued with care, can achieve more than a powerless motivation to care; power, without the intention to benefit others, can be ruthless. The contributors—who include such celebrated figures as Frans B. M. de Waal, Olafur Eliasson, Sarah Blaffer Hrdy, and Jody Williams—discuss topics including the interaction of power and care among our closest relatives, the chimpanzees; the effect of meditation and mental training practices on the brain; the role of religion in promoting peace and compassion; and the new field of Caring Economics. Contributors Paul Collier, Brother Thierry-Marie Courau, Frans B. M. de Waal, Olafur Eliasson, Scilla Elworthy, Alexandra M. Freund, Tenzin Gyatso (His Holiness the Dalai Lama), Markus Heinrichs, Sarah Blaffer Hrdy, Frédéric Laloux, Alaa Murabit, Matthieu Ricard, Johan Rockström, Richard Schwartz, Tania Singer, Dennis J. Robotech #2.2 Apr 03 2021 The struggle between humans and alien invaders attacking the Earth had drawn to a close, but the threat to mankind was far from over. With the fate of the universe on the line, a Robotech spacecraft was sent back in time, gifting the people of Earth's past an advanced alien technology that could alter their fortune, if not the timestream. Hidden in that vessel, in a decade-long hypersleep, was a passenger from the future: warrior, hero and first child born to the union of human and alien, Dana Sterling. She awakened too late to prevent the first Robotech war from erupting, but just in time to become a wedge between the two people who would, in her universe, become her parents. Dana's arrival created a splinter timeline where she was never born, where everything feels like her past but nothing is quite right. She clearly doesn't belong but has no way to return to her reality – if it even exists anymore. But now an opportunity has arisen in the shape of two mysterious spaceships able to travel the multiple realists of the "Protoverse". Could this be Dana's path home? The pilot of one vessel appeared to recognise her while the other, now crashlanded and laying injured and unconscious in the wasteland outside New Macross City, has targeted Dana for elimination...

The Jungian Tarot Deck Sep 20 2022 Dr. Robert Wang developed The Jungian Tarot as a "visual gateway into the complexities of Jungian psychology" to aid in the process of active imagination proposed by Carl Jung. The 22 Major Arcana represent Jungian archetypes of the collective unconscious. The figures are visually presented with archways and circular mandalas, which aid in meditation. The court cards depict family roles: father, mother, daughter and son. The deck is a companion to the Jungian Tarot Trilogy by Robert Wang.

The Rise of Global Health Dec 11 2021 Chronicles the expanding global effort to confront public health challenges. Since the year 2000, unprecedented resources have been committed to the complex challenge of developing global public health solutions by national governments, multilateral organizations, and civil society groups. This vast global movement is one of the most remarkable political phenomena of twenty-first-century international relations—but is it working? In The Rise of Global Health, Joshua K. Leon argues against the conventional wisdom, which argues that collective action on development issues—including controversial increases in foreign aid—is too inherently inefficient to succeed. Leon shows that public action on a global level can successfully pursue health equality. Often at the behest of grassroots activists, these disparate groups of actors are cooperating more than ever with the aim of improving our human potential through better health. Though operating at cross purposes with unequal trade agreements and other factors within the global economy harming the Global South, we learn something surprising about global health governance—it is evolving in ways more efficient than we think. Joshua K. Leon is Assistant Professor of Political Science and International Studies at Iona College.

This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.

Angels and Demons in Art Sep 27 2020 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, Angels and Demons in Art will delight readers with an interest in art or religious symbolism.

The Essential Jesus Jul 06 2021 After his definitive The Historical Jesus, John Dominic Crossan delivered Jesus: A Revolutionary Biography--a popularized, bestselling account of what we can know about the life of

Jesus. Here he offers the core of his life's work--a concise and astonishing presentation of the authentic teachings and earliest images of the revolutionary Galilean sage. Crossan's fresh translations of Jesus' sayings show Jesus to be a teacher whose radical message that all are equal before God is as timely today as it was two thousand years ago. This picture is dramatically confirmed by the preConstantinian, Christian renderings of Jesus, which show that he was remembered by the first Christians not as God but as a revolutionary healer and leader.

Reclaiming Fair Use Dec 31 2020 In the increasingly complex and combative arena of copyright in the digital age, record companies sue college students over peer-to-peer music sharing, YouTube removes home movies because of a song playing in the background, and filmmakers are denied a distribution deal when some permissions "i" proves undottable. Patricia Aufderheide and Peter Jaszi chart a clear path through the confusion by urging a robust embrace of a principle long-embedded in copyright law, but too often poorly understood—fair use. By challenging the widely held notion that current copyright law has become unworkable and obsolete in the era of digital technologies, Reclaiming Fair Use promises to reshape the debate in both scholarly circles and the creative community. This indispensable guide distills the authors' years of experience advising documentary filmmakers, English teachers, performing arts scholars, and other creative professionals into no-nonsense advice and practical examples for content producers. Reclaiming Fair Use begins by surveying the landscape of contemporary copyright law—and the dampening effect it can have on creativity—before laying out how the fair-use principle can be employed to avoid copyright violation. Finally, Aufderheide and Jaszi summarize their work with artists and professional groups to develop best practice documents for fair use and discuss fair use in an international context. Appendixes address common myths about fair use and provide a template for creating the reader's own best practices. Reclaiming Fair Use will be essential reading for anyone concerned with the law, creativity, and the ever-broadening realm of new media.

Facial-Oral Tract Therapy (F.O.T.T.) Oct 29 2020 The book offers a comprehensive approach to the assessment and treatment of disturbances

in facial expression, oral movement, swallowing, breathing, voice and speech production caused by developmental and acquired neurological conditions. The principles outlined are used in patients with different etiologies (e.g. stroke, tumors, traumas). F.O.T. T., developed by Kay Coombes, is a hands-on approach based on an understanding of neurological functions and the way we learn from experience. The approach aims to give the patient experience of physiological posture and movement using facial-oral functions in normal activities of daily living (ADL). Rather than mere “exercises”, F.O.T.T involves meaningful activities aiming to promote participation, according to ICF criteria. Four main areas are covered: nutrition, oral hygiene, nonverbal communication and speech. Each chapter summarises the problems of severely ill patients and shows the clinical reasoning behind the solutions offered. Separate chapters discuss tracheostomy management and the training of the carers involved, including relatives. The chapter authors are experienced specialists (physio-, occupational- and speech-language therapists and physicians), whose contributions aim to provide interdisciplinary perspectives and translate latest research into clinical practice.
