The Complete Songs of Hugo Wolf** **Dynamics** **The Princess Who Wouldn't Smile**

The first English-language biography in more than two decades of the French writer, one of the great novelists of the twentieth century. Louis-Ferdinand Céline was one of the most innovative novelists of the twentieth century, and his influence both in his native France and beyond remains huge. This book sheds light on Céline's groundbreaking novels, which drew extensively on his complex life: he rose from humble beginnings to worldwide literary fame, then dramatically fell from grace only to return, belatedly, to the limelight. Céline's subversive writing remains fresh and urgent today, despite his controversial political views and inflammatory pamphlets that threatened to ruin his reputation. The first English-language biography of Céline in more than two decades, this book explores new material and reminds us why the author belongs in the pantheon of modern greats. Ferdinand III played a crucial role both in helping to end the Thirty Years' War and in re-establishing Habsburg sovereignty within his hereditary lands, and yet he remains one of the most neglected of all Habsburg emperors. The underlying premise of *Sacred Music as Public Image for Holy Roman Emperor Ferdinand III* is that Ferdinand's accomplishments came not through diplomacy or strong leadership but primarily through a skillful manipulation of the arts, through which he communicated important messages to his subjects and secured their allegiance to the Catholic Church. An important locus for cultural activity at court, especially as related to the Habsburgs' political power, was the Emperor's public image. Ferdinand III offers a fascinating case study in monarchical representation, for the war necessitated that he revise the image he had cultivated at the beginning of his reign, that of a powerful, victorious warrior. Weaver argues that by focusing on the patronage of sacred music (rather than the more traditional visual and theatrical means of representation), Ferdinand III was able to uphold his reputation as a pious Catholic reformer and subtly revise his triumphant martial image without sacrificing his power, while also achieving his Counter-Reformation goal of unifying his hereditary lands under the Catholic church. Drawing upon recent methodological approaches to the representation of other early modern monarchs, as well as upon the theory of confessionalization, this book places the sacred vocal music composed by imperial musicians into the rich cultural, political, and religious contexts of mid-seventeenth-century Central Europe. The book incorporates dramatic productions such as opera, oratorio, and Jesuit drama (as well as works in other media), but the primary focus is the more numerous and more frequently performed Latin-texted paraliturgical genre of the motet, which has generally not been considered by scholars as a vehicle for monarchical representation. By examining the representation of this little-studied emperor during a crucial time in European history, this book opens a window into the

unique world view of the Habsburgs, allowing for a previously untold narrative of the end of the Thirty Years' War as seen through the eyes of this important ruling family. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1968. *The Singer-Songwriter in Europe* is the first book to explore and compare the multifaceted discourses and practices of this figure within and across linguistic spaces in Europe and in dialogue with spaces beyond continental borders. The concept of the singer-songwriter is significant and much-debated for a variety of reasons. Many such musicians possess large and zealous followings, their output often esteemed politically and usually held up as the nearest popular music gets to high art, such facets often yielding sizeable economic benefits. Yet this figure, per se, has been the object of scant critical discussion, with individual practitioners celebrated for their isolated achievements instead. In response to this lack of critical knowledge, this volume identifies and interrogates the musical, linguistic, social and ideological elements that configure the singer-songwriter and its various equivalents in Europe, such as the French auteur-compositeur-interprète and the Italian cantautore, since the late 1940s. Particular attention is paid to the emergence of this figure in the post-war period, how and why its contours have changed over time and space subsequently, cross-cultural influences, and the transformative agency of this figure as regards party and identity politics in lyrics and music, often by means of individual case studies. The book's polycentric approach endeavours to redress the hitherto Anglophone bias in scholarship on the singer-songwriter in the English-speaking world, drawing on the knowledge of scholars from across Europe and from a variety of academic disciplines, including modern language studies, musicology, sociology, literary studies and history. In September 2005, the author began writing about what he ate while touring the world with the rock band Franz Ferdinand. Whether it's munching donuts with cops in Brooklyn, swallowing bull's balls with the band in Buenos Aires or queuing for a saveloy in South Shields, this work includes snapshots of life on the road. This book teaches everything you need to know to get started singing the music you love. After an introduction to vocal technique, the author takes you from proper posture and breathing techniques to strengthening the vocal chords through intoning. You'll learn how to sing without strain, and have fun practicing vocal exercises and singing songs. No matter what kind of music you prefer, if you want to sing, this is the book for you! Examining the chain of events that led to the Great War and what could reasonably have been done differently to avoid it, an acclaimed political psychologist creates plausible worlds, some better, some worse, that might have developed. *The Tale of Ferdinand Frog - Sleepy-Time-Tales - By Arthur Scott Bailey - Illustrated by Harry L. Smith - Children's Bedtime Tale - The Gunston Trust.* A charming story by Arthur Scott Bailey, of Ferdinand the Frog and his magical adventures with the help of his animal neighbors. Ideal for bedtime reading. Ages 3-5+ Vols. for 1957-61 include an additional (mid-January) no. called Directory issue, 1st-5th ed. The 6th ed. was published as the Dec. 1961 issue. Offering practical suggestions for the interpretation of all Schumann's solo and duet songs, this text provides for singers and pianists perspectives which can be used to bring to life the work of the German composer. A true classic with a timeless message! All the other bulls run, jump, and butt their heads together in fights. Ferdinand, on the other hand, would rather sit and smell the flowers. So what will happen when Ferdinand is picked for the bullfights in Madrid? *The Story of Ferdinand* has inspired, enchanted, and provoked readers ever since it was first published in 1936 for its message of nonviolence and pacifism. In WWII times, Adolf Hitler ordered the book burned in Nazi Germany, while Joseph Stalin, the leader of the Soviet Union, granted it privileged status as the only non-communist children's book allowed in Poland. The preeminent leader of Indian nationalism and civil rights, Mahatma Gandhi—whose nonviolent and pacifistic practices went on to inspire Civil Rights leader Martin Luther King, Jr.—even called it his favorite book. The story was adapted

by Walt Disney into a short animated film entitled Ferdinand the Bull in 1938. Ferdinand the Bull won the 1938 Academy Award for Best Short Subject (Cartoons). This book describes more than 220 copies of various astronomical publications by the missionary Ferdinand Verbiest, S.J. (1623-1688) sent from Peking. The "Dictionary of German National Biography" is unique, complete and comprehensive with biographies of 60,000 people from the German-speaking world. It covers not only individuals from Germany but also from Austria, Switzerland and other countries where German is or used to be spoken. Coverage stretches all the way from the time of Charlemagne to the present day and includes lesser-known as well as world-famous Germans. In order to ensure that entries were as objective as possible, only individuals whose life and works have come to an end were included. Includes cases argued and determined in the District Courts of the United States and, Mar./May 1880-Oct./Nov. 1912, the Circuit Courts of the United States; Sept./Dec. 1891-Sept./Nov. 1924, the Circuit Courts of Appeals of the United States; Aug./Oct. 1911-Jan./Feb. 1914, the Commerce Court of the United States; Sept./Oct. 1919-Sept./Nov. 1924, the Court of Appeals of the District of Columbia. When Machines Play Chopin brings together music aesthetics, performance practices, and the history of automated musical instruments in nineteenth-century German literature. Philosophers defined music as a direct expression of human emotion while soloists competed with one another to display machine-like technical perfection at their instruments. When Machines Play Chopin looks at this paradox between thinking about and practicing music to show what three literary works say about automation and the sublime in art. The Complete Songs of Hugo Wolf

gathers together for the first time every poem Wolf set to music. Alongside the original German texts are translations by leading Lieder expert Richard Stokes, who also provides illuminating commentary. The 36 poets set by Wolf are each given their own chapter: a brief essay on the poet is followed by a note on Wolf's connection with the writer, extracts from letters that throw light on the Songs and convey his mood at the time of composition, and the texts and translations. Short biographies of all Wolf's correspondents flesh out the extraordinary life of this genius. This will be an indispensable volume for all lovers of Lieder. Sentient animals, machines, and robots abound in German literature and culture, but there has been surprisingly limited scholarship on non-human life forms in German studies. This volume extends interdisciplinary research in emotion studies to examine non-humans and the affective relationships between humans and non-humans in modern German cultural history. In recent years, fascination with emotions, developments in robotics, and the burgeoning of animal studies in and beyond the academy have given rise to questions about the nature of humanity. Using sources from the life sciences, literature, visual art, poetry, philosophy, and photography, this collection interrogates not animal or machine emotions per se, but rather uses animals and machines as lenses through which to investigate human emotions and the affective entanglements between humans and non-humans. The COVID-19 pandemic made us more keenly aware of the importance of both animals and new technologies in our daily lives, and this volume ultimately sheds light on the centrality of non-humans in the human emotional world and the possibilities that relationships with non-humans offer for enriching that world.
