Weiss's humorous, down-to-earth style takes all the mystery and intimidation out of cycling and will inspire even the most hesitant couch potato to get out and ride! Eben Weiss is the blogger behind Bike Snob NYC. He is the author of Bike Snob, Bike Snob Abroad, and The Enlightened Cyclist. He lives in New York City with his family. The most trustworthy source of information available today on savings and investments, taxes, money management, home ownership and many other personal finance topics. Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. One of the responsibilities of every dog or cat owner is that of coat care. There are many and varied coat types and there is a vast difference between the time it takes to groom a Doberman and an Old English Sheepdog, a Siamese and a Persian cat. This book provides much needed guidance for groomers, breeders and owners. It will be invaluable for those taking the City and Guilds 775 Grooming exam and animal care students of all levels. Step by step

grooming/clipping techniques are described for the more popular breeds of dog and cat and in each case the technique is illustrated with photographic sequences. The book also includes allied subjects such as skin care, commonly found skin parasites and basic first aid and handling.

Drying Hardwood Lumber focuses on common methods for drying lumber of different thickness, with minimal drying defects, for high quality applications. This manual also includes predrying treatments that, when part of an overall quality-oriented drying system, reduce defects and improve drying quality, especially of oak lumber. Special attention is given to drying white wood, such as hard maple and ash, without sticker shadow or other discoloration. Several special drying methods, such as solar drying, are described, and proper techniques for storing dried lumber are discussed. Suggestions are provided for ways to economize on drying costs by reducing drying time and energy demands when feasible. Each chapter is accompanied by a list of references. Some references are cited in the chapter; others are listed as additional sources of information.

Manual J 8th Edition is the national ANSI-recognized standard for producing HVAC equipment sizing loads for single-family detached homes, small multi-unit structures, condominiums, town houses, and manufactured homes. This new version incorporates the complete Abridged Edition of Manual J. The manual provides quick supplemental details as well as supporting reference tables and appendices. A proper load calculation, performed in accordance with the Manual J 8th Edition procedure, is required by national building codes and most state and local jurisdictions. This User's Manual provides detailed instruction for the design of commercial and high-rise residential buildings to ensure their compliance with ANSI/ASHRAE/IESNA Standard 90.1-2004. In addition, this Manual: encourages the user to apply the principles of effective energy-conserving design when designing buildings and building systems; offers information on the intent and application of Standard 90.1; illuminates the Standard through the use of abundant sample calculations and examples; streamlines the process of showing compliance; provides Standard forms to demonstrate compliance; provides useful reference material to assist designers in efficiently completing a successful and complying design. This Manual also instructs the user in the application of several tools used for compliance with Standard 90.1: the EnvStd computer program used in conjunction with the Building Envelope Trade-Off compliance method; the selection and application of energy simulation programs used in conjunction with the energy cost budget method of compliance. This Manual is intended to be useful to numerous types of building professionals, including: architects and engineers who must apply the Standard to the design of their buildings; plan examiners and field inspectors who must enforce the Standard in areas where it is adopted as code; general and specialty contractors who must construct buildings in compliance with the standard; product manufacturers, state and local energy offices, policy groups, utilities, and others. (String Letter Publishing).
