Svet ako celok sa vyvíja natolko dynamicky a často i chaoticky, že kategorizácia a inventarizácia globálnych problémov sa stávajú stále

ťažšími a ich okruh sa značne rozširuje. Časť z týchto problémov nemožno jednoznačne, presne a jasne definovať, vymedziť ich hranice, vzájomnú hierarchizáciu a mnohotvárnosť prepojenia. Väčšina globálnych problémov má bezpochyby základnú ekonomickú dimenziu a bezprostredne ovplyvňuje svetové hospodárstvo. V posledných rokoch sa čoraz častejšie o globálnych problémoch hovorí aj na Slovensku predovšetkým rastom rozdielov ekonomického a sociálneho rozvoja v rámci jednotlivých regiónov. Pojem globalizácia nadobudol ešte väčší rozmer vďaka finančnej kríze, ktorá prerástla do krízy hospodárskej. Slovensko sa na začiatku 21. storočia stalo bezprostrednou súčasťou globalizačných megatrendov ľudskej civilizácie, ktoré predstavujú určujúci exogénny faktor prenikajúci do všetkých podstatných aspektov vývoja slovenskej spoločnosti. Jeho ekonomika však nepôsobí v globalizovanej svetovej ekonomike jednotlivo, ale ako

organická súčasť integračného zoskupenia Európskej únie, ktoré mu poskytuje integrovaný priestor rozvoja. Globalizácia sa pokladá azda za najvplyvnejší proces určujúci budúcnosť svetového spoločenstva. Ťažisková argumentácia postojov ku globalizácii vychádza z ekonomických a ekonomicko-sociálnych súvislostí. Aj táto práca sa preto vo svojom úvode sústreďuje na ekonomickú dimenziu globalizácie s prihliadnutím, že nejde o úplne nový jav. Prezентuje výsledky vyhodnotenia vplyvu globalizácie na ekonomiku SR a načrtáva základné rámce adaptačnej stratégie SR na tieto tendencie. Americká kríza, ktorá vypukla na sklonku roka 2007 žiaľ, má vplyv aj na európsku ekonomiku a v konečnom dôsledku aj na Slovensko. Situácia, v ktorej sa priemysel SR ocitol, vyžadovala venovať pozornosť širším súvislostiam a nenechať bez povšimnutia globálne problémy, ktoré prerástli do finančnej a hospodárskej krízy. Prejavom krízy je hlavne

stagnácia vo výrobe automobilov. V slovenskej ekonomike sa vplyvom krízy postihnutie dotýka predovšetkým vývozcov z automobilového priemyslu, ich dodávateľov ale aj iných firiem. Cieľom predkladanej štúdie nie je analýza všetkých aspektov globalizačných procesov, ale snaha načrtnúť najdôležitejšie trendy, vplyvy a dopady globálnej krízy na náš priemysel v národnom i regionálnom meradle. Podmienil to plytký a nekomplexný prístup k objasneniu príčinných súvislostí, určujúcich prvkov obsahu a foriem prejavu procesu globalizácie. Dôsledky globálnej krízy sú premietnuté do problémov najväčších automobilových koncernov sveta, pretože niektoré z nich sa stali bezprostrednou súčasťou stavu našej ekonomiky. Regionálne dopady sú podrobnejšie analyzované v kapitole priamych zahraničných investícií a priemyselných parkov. Il manuale di riparazione RTA Citroen C3, è la rivista tecnica

chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations. Auszug: Der 2CV (französisch deux chevaux), in Deutschland üblicherweise Ente genannt, war ein populäres Modell des Automobilherstellers Citroen mit einem luftgekühlten Zweizylinder-Viertakt-Boxermotor und Frontantrieb.

Zwischen 1949 und 1990 wurden 3.868.631 viertürige Limousinen und 1.246.335 Lieferwagen (Kastenente) hergestellt. Von 1961 bis 1966 (und 1971) wurde in kleiner Stückzahl auch eine Ausführung mit zwei Motoren und Allradantrieb gebaut, die bereits 1958 vorgestellt worden war. Die Entwicklung begann bereits Mitte der 1930er-Jahre; kriegsbedingt stellte Citroen den neuen 2CV erst am 7. Oktober 1948 in Paris der Öffentlichkeit vor. Von der Fachpresse anfangs belächelt, wurde der 2CV in den folgenden... Recycled plastic biocomposites have attracted widespread attention from both researchers and manufacturers due to the significant improvements in their physico-mechanical, thermal, rheological, and barrier properties when compared to conventional materials, as well as their potential regarding commercialization and zero waste. Recycled Plastic Biocomposites presents the latest information on recycled

polymers, textiles, pulp and paper, wood plastic, rubber waste plastic, and micro and nano effects of recycled plastic waste resources that have great potential as reinforcement materials in composites because they are non-toxic, inexpensive, biodegradable, cost-effective, and available in large amounts. Recycled plastic biocomposites are now starting to be deployed in a broad range of materials applications due to their advantages over petroleum-based materials. Currently, there are no limits to the possibility of their applications. They also have exceptional sustainable and biodegradable properties when compared to conventional materials such as polymers and composites. Recycled Plastic Biocomposites reviews the latest research advances on recycled plastic-based biocomposites, including thermoplastic, thermoset, rubber, and foams. In addition, the book covers critical assessments on the economics of recycled plastic, including a cost-performance analysis that

discusses its strengths and weaknesses as a reinforcement material. The huge potential applications of recycled plastic in industry are also explored in detail with respect to low cost, recyclable and biodegradable properties, and the way they can be applied to the automotive, construction, and packaging industries. The life cycles of both single and hybrid recycled plastic-based polymer composites and biocomposites are also discussed in detail. From the viewpoint of recycled plastic-based polymer composites, the book covers not only the well-known role of recycled polymers and composites, but also advanced materials produced from micro-, nano-, and pico-scale fillers that achieve better physical, mechanical, morphological, and thermal properties. This book will be an essential reference resource for academic and industrial researchers, materials scientists, and those working in polymer science and engineering, chemical engineering, manufacturing,

and biocomposites. Places an emphasis on micro-, nano-, and pico-scale fillers that significantly improve properties. Discusses the most suitable fabrication methods, properties, and applications. Features critical assessments on the economics of recycled plastic, including a cost-performance analysis that reviews its strengths and weaknesses as a reinforcement material. This comprehensive new edition of *How to Design Cars Like a Pro* provides an in-depth look at modern automotive design. Interviews with leading automobile designers from Ford, BMW, GM Jaguar, Nissan and others, analyses of past and present trends, studies of individual models and concepts, and much more combine to reveal the fascinating mix of art and science that goes into creating automobiles. This book offers a critical analysis of recent developments in the automotive industry of East-Central Europe (ECE). Economists, industry specialists and national governments have considered the rapid development of the automotive industry in ECE in the past twenty years an unqualified success. This rapid growth has been based on large inflows of foreign direct investment (FDI) from Western Europe, North America, Japan and South Korea, and it significantly contributed to GDP growth, created thousands of new jobs, and completely transformed the previously existing automotive industry in the region. This volume offers an analysis that goes beyond uncritical celebratory accounts of this rapid growth. It is based on original, detailed firm-level research conducted by the author in Czechia and Slovakia between 2009 and 2015 that covered assembly firms and the networks of component suppliers. Theoretically and

conceptually, the analysis will draw on the global production networks and global value chains perspectives. Drawing on the original empirical data and on additional available information, this volume concentrates on several important questions related to the development of the automotive industry in ECE in the 2000s:

- The role of FDI in the rapid development of the automotive industry after 1990 and particularly in the 2000s.
- The upgrading of the automotive industry in East-Central Europe through FDI.
- The position of ECE in the automotive industry research and development (R&D).
- The effects of the 2008-2009 economic crisis in the automotive industry of ECE.
- The role of state in the rapid development of the automotive industry in ECE in the 1990s and 2000s.
- The effects of FDI on domestic firms in the form of linkages between foreign-owned and domestic firms and spillovers from foreign-owned to domestic firms.

In this new view of the Citroen story, automotive/aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroen, but the aeronautical and cultural origins that lay behind Citroen's form and function. The book digs deep into the ethos of Automobiles Citroen to create a narrative on one of the greatest car manufacturers in history. Using interviews, translations, archive documents and specially-commissioned photographs, the Citroen journey is cast in a fresh perspective. It explains in detail the influences upon Citroen design: Voisin, Lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroen designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s-1970s expansion, it also cites less well-known names of Citroen's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargent and others, to give a

full picture of Citroen heritage. The book provides in-depth analysis of all major Citroen models with an engineering and design focus and profiles key individuals and cars up to the present day and Citroen's 'DS'-branded resurgence. It features many newly commissioned photographs, rare archive drawings and interviews with Citroen owners. Researched amongst leading Citroen experts and restorers, Lance Cole provides a fresh perspective on the Citroen car manufacturer, its design language and the legacy of its extraordinary engineering which will be of great interest to all Citroen and motoring enthusiasts.  This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical

account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.
