The goal of this guide is to have every mathematical formula and procedure under one roof. This handbook is similar to a formula sheet. It's a collection of formula sheets and instructions on how to use each equation. I call these sheets "tool sheets." A builder needs tools to build his/her house like an engineer needs equations to design and solve problems. This guide can act as your tool belt. Hopefully, it will help build your house, meaning get accepted into college, to begin building the foundation of your future. Throughout the course of studying for the SAT or ACT exam, this guide is best used with problem sets and practice tests. I've personally used this guide as a teaching tool with my former students. It has proved to service both the person learning the material as well as the person teaching the material.
