Matt Keegan interviews artists and commissions writing to reassess the 1990s as the moment when the Democratic Party abandoned its New Deal values and swung to the right In the wake of the Trump election, artist Matt Keegan (born 1976) began investigating the Democratic Party's shifts over recent decades. In the late '80s, members of the Democratic Leadership Council successfully moved the party's platform to the right by including a pro-business, pro-military, interventionist agenda, and downplaying social infrastructure as a calculated break from its New Deal-era foundation. This shift led to Bill Clinton's consecutive terms. 1996 captures this pivotal time in American politics and society through the experience of artists who completed their undergraduate studies in that year and voted for Clinton, and others who were born in 1996 and voted for the first time in 2016. Essays focus on cultural and ideological shifts from that time, such as the 1994 Crime Bill, 1996 Immigration Act, the Telecommunications Act, the start of Fox News and beyond. Terrorists, drug traffickers, mafia members, and corrupt corporate executives have one thing in common: most are conspirators subject to federal prosecution. Federal conspiracy laws rest on the belief that criminal schemes are equally or more reprehensible than are the substantive offenses to which they are devoted. The essence of conspiracy is an agreement of two or more persons to engage in some form of prohibited misconduct. The crime is complete upon agreement, although some statutes require prosecutors to show that at least one of the conspirators has taken some concrete steps or committed some overt act in furtherance of the scheme. There are dozens of federal conspiracy statutes. This book examines conspiratorial crimes and related federal criminal law with a focus on the federal Racketeer Influenced and Corrupt Organization (RICO) provision of the Organized Crime Control Act of 1970; money laundering and the 18 U.S.C. 1956 statute; mail and wire fraud; and an overview of federal criminal law. "Dr. Phil," Canada's best-known automotive expert for more than forty-five years, pulls no punches. Lemon-Aid New and Used Cars and Trucks 1990-2015 steers the confused and anxious buyer through the purchase of new and used vehicles unlike any other car-and-truck book on the market. "Dr. Phil," Canada's best-known automotive expert for more than 42 years, pulls no punches. Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki An eye-opening response to Aldous Huxley's widely influential work on psychedelics, physical reality, and consciousness What exactly are hallucinations? Are they actually doors to another reality? Anthony Peake thinks so. In this stunning book, he takes Aldous Huxley's The Doors of Perception and updates it using the latest information from quantum mechanics, neurochemistry, and consciousness studies. Most human beings perceive the doors of perception as being securely closed. But here, Peake analyzes the concept of 'the scale of transcendence' and suggests there is a scale of perceptions whereby the doors are slowly opened, bit by bit, to reveal the true nature of reality. For 'normal' people, glimpses of this reality—what the Gnostics called 'The Pleroma'—are experienced during 'noetic' experiences. However, for others, the doors are prized open by certain neurological processes starting with migraine and progressing through various altered states such as temporal lobe epilepsy, bipolar syndrome, autism, and schizophrenia. A pioneering work on the relationship between physical reality and consciousness, Opening the Doors of Perception suggests that man can, indeed, perceive reality in its true glory. F1 Mavericks is the story of the grandest, most influential, and most fondly remembered era in Formula 1 racing as seen through the lens of master motorsports photographer, Pete Biro. The period from 1960 to 1982 saw the greatest technological changes in the history of Formula 1 racing: the transition from front engines to rear engines, narrow-treaded tires, massive racing slicks, zero downforce, and neck-wrenching ground effects—and, of course, a staggering increase in performance and reduction in lap times. In short, the period saw the creation of the modern Formula 1 car. This is also the time when legendary names who defined F1 were out in full force: Jim Clark, Jack Brabham, Dan Gurney, Sir Jackie Stewart, Graham Hill, Niki Lauda, James Hunt, Bruce McLaren, Jody Scheckter. We'll see and meet all of them. But F1 Mavericks also focuses on the designers and engineers behind the cars—men like Colin Chapman, Sir Patrick Head, Maurice Philippe, Franco Rochhi, Gordon Murray, and many others. We'll hear directly from many of them, including a foreword from 1978 F1 World Champion, Mario Andretti. Every chapter is a photographic account of key races throughout the period, supplemented with sidebars featuring key designers and technologies, like wings, ground effects, slick tires, turbochargers, and the Brabham "fan" suction car. F1 Mavericks is an international story, and includes loads of information on designs from Japan (Honda), Britain (McLaren, Tyrrell, Cooper, BRM) Italy (Ferrari, Maserati, Alfa Romeo), France (Matra, Ligier, Renault), Germany (Porsche, BMW) and the United States (Eagle, Shadow, Penske, Parnelli). Strap yourself in for the story of the greatest era in Formula 1 racing—it's all here in F1 Mavericks. An ethnography of advertising in postmillennial South Korea, *Flower of Capitalism: South Korean Advertising at a Crossroads* details contests over advertising freedoms and obligations among divergent vested interests while posing far-reaching questions about the social contract that governs advertising in late-capitalist societies. The term “flower of capitalism” is a clichéd metaphor for advertising in South Korea, bringing resolutely positive connotations, which downplay the commercial purposes of advertising and give prominence to its potential for public service. Historically, South Korean advertising was tasked to promote virtue with its messages, while allocation of advertising expenditures among the mass media was monitored and regulated to curb advertisers’ influence in the name of public interest. Though this ideal was often sacrificed to situational considerations, South Korean advertising had been remarkably accountable to public scrutiny and popular demands. This beneficent role of advertising, however, came under attack as a neoliberal hegemony consolidated in South Korea in the twenty-first century. *Flower of Capitalism* examines the clash of advertising’s old obligations and new freedoms, as it was navigated by advertising practitioners, censors, audiences, and activists. It weaves together a rich multi-sited ethnography—at an advertising agency and at an advertising censorship board—with an in-depth exploration of advertising-related controversies—from provocative advertising campaigns to advertising boycotts. Advertising emerges as a contested social institution whose connections to business, mass media, and government are continuously tested and revised. Olga Fedorenko challenges the mainstream notions of advertising, which universalize the ways it developed in Transatlantic countries, and offers a glimpse of what advertising could look like if its public effects were taken as seriously as its marketing goals. A critical and innovative intervention into the studies of advertising, *Flower of Capitalism* breaks new ground in current debates on the intersection of media, culture, and politics. A colorful and captivating book examining Bruce Meyer’s passion for hot rods, featuring eight iconic ’32 Ford Hot Rods from his renowned automobile collection. Author Ken Gross combines cultural history, technical specifications and an aesthete’s sensibility to narrate the story of hot rodding’s evolution from lawless to legitimate, and explains why the “Deuce” hot rod resonates so strongly with Bruce. In addition, Chip Foose offers an expert’s insight on the 1932 Ford’s styling cues and hot rod legend Alex Xydias provides the foreword. *DEUCE!* features many historic images, as well as modern studio shots by Peter Harholdt.
