2022-23 UGC-NET/JRF History Solved Papers Vols. 10-11 include Meteorology of England by James Glaisher as seperately paged section at end. Every season in the Northwoods is a wonder of plants and animals. This book features detailed and fascinating descriptions of the natural cycles during fall and winter. You??I know what??s blooming, crawling, singing or migrating in any month. Children describe their favorite things to do during the winter, from playing in the snow to indoor activities. Vivid photographs of frozen wonderlands and cold-weather fun come together in a lively tribute to winter by an acclaimed author-photographer. This third book in a celebrated series about the seasons takes children from the shortest day of the year to the approach of spring. In beautiful photographs and a short text ROTNER notes changes in the physical earth as winter approaches as well as animal and plant adaptations. A glossary is included. FBI agent Josh Metcalf believes he has uncovered a decades-long conspiracy involving missing children. His obsession has led him to compile hundreds of cases. All involve children rumored to have psychic abilities--and all have no witnesses, no leads, and no resolution. Meanwhile, Rowan Wilson, a meteorite hunter for NASA's Spaceguard Program, is losing her grip on the past. Memories of the childhood she thought she'd had are vanishing, and dark recollections of kidnappings, mind control, and an isolated mountain ranch are taking their place. When Rowan's shadowed past converges with Josh's research, they uncover a deadly plot to reshape humanity. With the world's survival dependent on stopping a vast network of conspirators, can they decipher--and expose--the truth in time? Revised edition: This edition of The Faithful includes editorial revisions. Immerse yourself in this utterly addictive forbidden love story that has captivated thousands of readers around the world. “We are not meant to be together. I should’ve known better. And yet…” Petra, a seventeen-year-old Dutch-American and the only heir of finance tycoon Roy Van Gatt, has always had her life rigorously planned and supervised by her strict father. From her internship at his hedge fund firm on Wall Street to her degree in Economics at Columbia University, Petra is all set for a bright future in finance. But everything falls apart when she develops a dangerous relationship with her father’s business partner and utmost confidant, Alexander Van Dieren. A Dutch nobleman, known as an unrepentant heartbreaker, twenty-three years her senior, and who is, above all else, her beloved godfather. A twisted obsession for some, unconditional love for others, but one thing is sure: it’s a relationship that might cost them everything… This book is for mature audiences. ????? Secret Service agent Winter has just two weeks to bring down a site on the dark web before an innocent girl is murdered in front of an online audience of millions. Going deep undercover disguised as a paid assassin – alias Snow White – Winter must infiltrate the inner circle of the extraordinarily powerful man at the heart of the dark web. When Winter stumbles upon the body of a man from her past with a bullet through his forehead, the clues begin to slot into place. With the girl’s fate growing darker with every tick of the clock, can Winter put together the pieces in time to save her life? The second volume in his autobiographical quartet based on the seasons, Winter is an achingly beautiful collection of daily meditations and letters addressed directly to Knausgaard's unborn daughter 2 December - It is strange that you exist, but that you don't know anything about what the world looks like. It's strange that there is a first time to see the sky, a first time to see the sun, a first time to feel the air against one's skin. It's strange that there is a first time to see a face, a tree, a lamp, pajamas, a shoe. In my life it almost never happens anymore. But soon it will. In just a few months, I will see you for the first time. In Winter, we rejoice the great Karl Ove Knausgaard as he waits for the birth of his daughter. In preparation for her arrival, he takes stock of the world, seeing it as if for the first time. In his inimitably sensitive style, he writes about the moon, water, messiness, owls, birthdays--to name just a handful of his subjects. These oh-so-familiar objects and ideas he fills with new meaning, taking nothing for granted or as given. New life is on the horizon, but the earth is also in hibernation, waiting for the warmer weather to return, and so a contradictory melancholy inflects his gaze. Startling, compassionate, and exquisitely beautiful, Knausgaard's writing is like nothing else. Somehow, he shows the world as it really is, at once mundane and sublime. Friends of the Earth is a carefully graded Environmental Studies series for classes 1 to 5. The series adheres to the National Curriculum Framework 2005 and the books have been designed in accordance with the latest guidelines laid down by the NCERT. Earthworms (Verms) have long been described as the intestine of the earth, friends of farmers and so on, because of their manifold functions in the soil. Recently, earthworms have come to be recognized as one of the bioreactors due to their ability to degrade organic waste materials into available vermin-compost and the technology is being described as vermiculture technology or Vermitechnology. Due to population explosion beyond the limit and rapid urbanization, total agricultural land area is decreasing day by day. These are directly affecting the crop production. Although due to the usage of various chemical fertilizers and pesticides, yield of crop production have been increased multi-folds, but their excessive and imbalance usage causing tremendous alterations in natural soil environment. In order to cope with this trenchant problem, the vermitechnology has become the most suitable remedial device of the day. Therefore, the present book entitled Verms & Vermitechnology has been edited to make the low cost vermitechnology a grand success among the farmers, researchers and academicians. Nominated as one of America’s best-loved novels by PBS’s The Great American Read. Renowned hip-hop artist, writer, and activist Sister Souljah brings the streets of New York to life in a powerful and utterly unforgettable first novel. I came busting into the world during one of New York’s worst snowstorms, so my mother named me Winter. Ghetto-born, Winter is the young, wealthy daughter of a prominent Brooklyn drug-dealing family. Quick-witted, sexy, and business-minded, she knows and loves the streets like the curves of her own body. But when a cold Winter wind blows her life in a direction she doesn’t want to go, her street smarts and seductive skills are put to the test of a lifetime. Unwilling to lose, this ghetto girl will do anything to stay on top. The Coldest Winter Ever marks the debut of a gifted storyteller. You will never forget this Winter’s tale. Master Guide CHSL provides complete coverage of syllabus. 2. Divided into 4 sections it gives complete overview of the theories. 3. 5 Section Tests are given in each chapter to indicate the examination trend. 4. 3 solved papers and Previous Years’ questions are encrypted for better understanding. 5. The book also contains 3 Mock Tests for rigorous practice. Every year the Staff Selection Commission (SSC) conducts SSC CHSL exams to recruit eligible candidates for various posts such as LDC, JSA, DEO, PA and SA in various departments of the Government of India. The book “Master Guide CHSL” is strictly prepared according to the prescribed syllabus for the aspirants of CHSL (10+2) Tier I examination. Divided into 4 sections- General Intelligence, Quantitative Aptitude, English Language and General Awareness, it provides complete coverage of syllabus. Each chapter is encrypted with 5 Section Tests, to showcase the trend of the exam. 3 latest solved papers (2019-2021) and Previous Years’ questions help in better understanding of the concept and question type. Apart from theories, it also contains 3 mock tests based on the latest pattern for quick revision and rigorous practice. This book will be highly beneficial to all the aspirants preparing for SSC CHSL exams. TOC Solved Papers [2021-2019], General Intelligence, Quantitative Aptitude, English Language, General Awareness, Mock Test [1-3]. Most people think summer is the warmest season. This story, however, is brimming with evidence to the contrary--from roaring fires to grilled cheese sandwiches to toasty flannel pajamas. A unique twist on the traditional wintertime picture book, the beautiful visual narrative follows a boy and his family though a day of hot breakfasts, steaming afternoon cocoa, and a festive candlelit supper before bed. With its inviting scenes, poetic text, and gorgeous illustrations, Winter Is the Warmest Season celebrates all the wonderful things that make winter the coziest time of the year. Presents the journal of Toni Bentley's life as a dancer for the New York City Ballet, her day-to-day activities, and the emotional struggles that members of George Balanchine's troupe faced. ‘Winter,’ he says. ‘You’re going rogue again.’ ‘Desperate times.’ ‘This is like chess and you’re the Queen. The best player on the board doesn’t get into a fight with a pawn.’ ‘The Guardsman is no pawn.’ Winter returns to face the most feared hitman of all time: the nameless, faceless contract killer, the Guardsman. Secret Service agent Winter knows global crime boss Alek Konstantin’s days are numbered after she seduced him, then revealed his identity to the world. Now, permanently on the run from the authorities, Alek fights to regain control as the brutal criminal organisation he ruled with an iron fist crushes down around him. Then a young woman called Lucy is viciously stabbed and dumped on a mossy grave, a harrowing message for Winter carved on her forehead. Winter follows the trail to the Guardsman – a pitiless contract killer, and Alek’s top hitman. Has the Guardsman gone rogue or is Alek pulling the strings to taunt Winter once more? In a desperate bid to lure Lucy’s killer from the shadows and find a path to Alek, Winter books the Guardsman for a hit on herself. If she succeeds, she’ll have the world’s most dangerous killer at her mercy. But if she fails... A spine-tingling suspense thriller, perfect for fans of Sandra Brown and The Girl with the Dragon Tattoo. What readers are saying about Alex Callister: ‘Wow! Double wow!! Triple wow!!!!... This book took me for a ride on a rollercoaster... This book definitely gets a place in my top for 2020.... If this is what Winter is like, I don't like the other seasons anymore.’ B for Book Review, 5 stars ‘A clever, original spy thriller... There are nods to Bond and Bourne throughout Winter Dark... She could seduce Bond and leave him heart broken. She could outfight Bourne and leave his legs broken... Winter Dark is a gripping, pacy and highly original thriller. Highly recommended.’ Goodreads reviewer, 5 stars ‘This book was really good! I love the main character! I can't wait to read more of the stories! The book is full of action-packed thrills and rides!’ Goodreads reviewer ‘Winter is a badass character. There will be a movie made about this book... The author set out to create a female James Bond and pretty much hit it spot on... The book is a page-turner.’ Goodreads reviewer ‘A high-octane thriller... It is a thrill-a-minute, edge-of-your-seat thriller that will have you quickly turning the page... will keep you entertained and engrossed until it’s thrilling denouement. A great read that will spike your blood pressure accordingly – not for the faint-hearted!’ Goodreads reviewer ‘I wound up wrapped up in the story and couldn’t put it down.’ Goodreads reviewer ‘Loved it! I want more! Can’t wait for the next instalment.’ Goodreads reviewer, 5 stars ‘It is hard to put this one down! Lots of twists in this quite different and spectacular read! RECOMMEND HIGHLY!!!’ Goodreads reviewer, 5 stars ‘I loved it. Intense and filled with twists and turns. Just when you think you know what is going to happen next, Winter surprises you... I cannot wait for the next instalment!’ Goodreads reviewer ‘Now there is a new kid on the block, the love-child of Jack Reacher and Lisbeth Salander... she can out-punch Bourne and out-pull Bond.’ Independent ‘I am in heaven.’ Goodreads reviewer How we can create artificial intelligence with broad, robust common sense rather than narrow, specialized expertise. It’s sometime in the not-so-distant future, and you send your fully autonomous self-driving car to the store to pick up your grocery order. The car is endowed with as much capability as an artificial intelligence agent can have, programmed to drive better than you do. But when the car encounters a traffic light stuck on red, it just sits there—infinitely. Its obstacle-avoidance, lane-following, and route-calculation capacities are all irrelevant; it fails to act because it lacks the common sense of a human driver, who would quickly figure out what’s happening and find a workaround. In Machines like Us, Ron Brachman and Hector Levesque—both leading experts in AI—consider what it would take to create machines with common sense rather than just the specialized expertise of today’s AI systems. Using the stuck traffic light and other relatable examples, Brachman and Levesque offer an accessible account of how common sense might be built into a machine. They analyze common sense in humans, explain how AI over the years has focused mainly on expertise, and suggest ways to endow an AI system with both common sense and effective reasoning. Finally, they consider the critical issue of how we can trust an autonomous machine to make decisions, identifying two fundamental requirements for trustworthy autonomous AI systems: having reasons for doing what they do, and being able to accept advice. Both in the end are dependent on having common sense. A practical teacher's resource for Key Stage 1 geography, relevant to the National Curriculum and the Scottish Guidelines for Environmental Studies 5-14. It covers all the key requirements and provides sections of structured lesson plans on all main geographical themes; 80 linked copymasters, including both information and pupil activity sheets. A stranger’s arrival in the village stirs up ripples of speculation and interest. The village finds itself paying tribute to the stranger’s hero, a missionary born and bred in Thrush Green, and the stranger’s presence alters the romantic prospects of Miss Dimity Dean. The full scripts of award-winning Downton Abbey, season two including previously unseen commentary from Julian Fellowes Opening in 1916, as the First World War rages across Europe, Season Two is the next dramatic installment of the much-loved, award-winning drama. The Crawley family and their servants play their parts on the front line and back at home as their lives are intensified by the strains of war. The shooting scripts give a fascinating view of how Julian Fellowes weaves his storylines of love, loss, and betrayal to captivate the audience. With key insights into the research and creative processes, this will appeal to fans and students alike. Maize is used in an endless list of products that are directly or indirectly related to human nutrition and food security. Maize is grown in producer farms, farmers depend on genetically improved cultivars, and maize breeders develop improved maize cultivars for farmers. Nikolai I. Vavilov defined plant breeding as plant evolution directed by man. Among crops, maize is one of the most successful examples for breeder-directed evolution. Maize is a cross-pollinated species with unique and separate male and female organs allowing techniques from both self and cross-pollinated crops to be utilized. As a consequence, a diverse set of breeding methods can be utilized for the development of various maize cultivar types for all economic conditions (e.g., improved populations, inbred lines, and their hybrids for different types of markets). Maize breeding is the science of maize cultivar development. Public investment in maize breeding from 1865 to 1996 was \$3 billion (Crosbie et al., 2004) and the return on investment was \$260 billion as a consequence of applied maize breeding, even without full understanding of the genetic basis of heterosis. The principles of quantitative genetics have been successfully applied by maize breeders worldwide to adapt and improve germplasm sources of cultivars for very simple traits (e.g. maize flowering) and very complex ones (e.g., grain yield). For instance, genomic efforts have isolated early-maturing genes and QTL for potential MAS but very simple and low cost phenotypic efforts have caused significant and fast genetic progress across genotypes moving elite tropical and late temperate maize northward with minimal investment. Quantitative genetics has allowed the integration of pre-breeding with cultivar development by characterizing populations genetically, adapting them to places never thought of (e.g., tropical to short-seasons), improving them by all sorts of intra- and inter-population recurrent selection methods, extracting lines with more probability of success, and exploiting inbreeding and heterosis. Quantitative genetics in maize breeding has improved the odds of developing outstanding maize cultivars from genetically broad based improved populations such as B73. The inbred-hybrid concept in maize was a public sector invention 100 years ago and it is still considered one of the greatest achievements in plant breeding. Maize hybrids grown by farmers today are still produced following this methodology and there is still no limit to genetic improvement when most genes are targeted in the breeding process. Heterotic effects are unique for each hybrid and exotic genetic materials (e.g., tropical, early maturing) carry useful alleles for complex traits not present in the B73 genome just sequenced while increasing the genetic diversity of U.S. hybrids. Breeding programs based on classical quantitative genetics and selection methods will be the basis for proving theoretical approaches on breeding plans based on molecular markers. Mating designs still offer large sample sizes when compared to QTL approaches and there is still a need to successful integration of these methods. There is a need to increase the genetic diversity of maize hybrids available in the market (e.g., there is a need to increase the number of early maturing testers in the northern U.S.). Public programs can still develop new and genetically diverse products not available in industry. However, public U.S. maize breeding programs have either been discontinued or are eroding because of decreasing state and federal funding toward basic science. Future significant genetic gains in maize are dependent on the incorporation of useful and unique genetic diversity not available in industry (e.g., NDSU EarlyGEM lines). The integration of pre-breeding methods with cultivar development should enhance future breeding efforts to maintain active public breeding programs not only adapting and improving genetically broad-based germplasm but also developing unique products and training the next generation of maize breeders producing research dissertations directly linked to breeding programs. This is especially important in areas where commercial hybrids are not locally bred. More than ever public and private institutions are encouraged to cooperate in order to share breeding rigs, research goals, winter nurseries, managed stress environments, and latest technology for the benefit of producing the best possible hybrids for farmers with the least cost. We have the opportunity to link both classical and modern technology for the benefit of breeding in close cooperation with industry without the need for investing in academic labs and time (e.g., industry labs take a week vs months/years in academic labs for the same work). This volume, as part of the Handbook of Plant Breeding series, aims to increase awareness of the relative value and impact of maize breeding for food, feed, and fuel security. Without breeding programs continuously developing improved germplasm, no technology can develop improved cultivars. Quantitative Genetics in Maize Breeding presents principles and data that can be applied to maximize genetic improvement of germplasm and develop superior genotypes in different crops. The topics included should be of interest of graduate students and breeders conducting research not only on breeding and selection methods but also developing pure lines and hybrid cultivars in crop species. This volume is a unique and permanent contribution to breeders, geneticists, students, policy makers, and land-grant institutions still promoting quality research in applied plant breeding as opposed to promoting grant monies and indirect costs at any short-term cost. The book is dedicated to those who envision the development of the next generation of cultivars with less need of water and inputs, and with higher percentages of exotic germplasm as well as those that pursue independent research goals before searching for funding. Scientists are encouraged to use all possible breeding methodologies available (e.g., transgenics, classical breeding, MAS, and all possible combinations could be used with specific sound long and short-term goals on mind) once germplasm is chosen making wise decisions with proven and scientifically sound technologies for assisting current breeding efforts depending on the particular trait under selection. Arnel R. Hallauer is C. F. Curtiss Distinguished Professor in Agriculture (Emeritus) at Iowa State University (ISU). Dr. Hallauer has led maize-breeding research for mid-season maturity at ISU since 1958. His work has had a worldwide impact on plant-breeding programs, industry, and students and was named a member of the National Academy of Sciences. Hallauer is a native of Kansas, USA. José B. Miranda Filho is full-professor in the Department of Genetics, Escola Superior de Agricultura Luiz de Queiroz - University of São Paulo located at Piracicaba, Brazil. His research interests have emphasized development of quantitative genetic theory and its application to maize breeding. Miranda Filho is native of Pirassununga, São Paulo, Brazil. M.J. Carena is professor of plant sciences at North Dakota State University (NDSU). Dr. Carena has led maize-breeding research for short-season maturity at NDSU since 1999. This program is currently one the of the few public U.S. programs left integrating pre-breeding with cultivar development and training in applied maize breeding. He teaches Quantitative Genetics and Crop Breeding Techniques at NDSU. Carena is a native of Buenos Aires, Argentina. http://www.ag.ndsu.nodak.edu/plantsci/faculty/Carena.htm The NATO ARW in Irkutsk was an excellent occasion for the coming together of Eastern and Western scientists who are involved in tropospheric science; the workshop has greatly contributed to the scientific and social understanding among the participants from the many different countries. Many new personal contacts were made which will help to strengthen future collaborations. In particular, the Lake Baikal area and the Limnological Institute offer splendid opportunities for environmental research which, in part, is already on going. For most participants it was the first time to see the impressive nature of the Lake Baikal region. Hopefully, there will be a chance for a follow-up event in Siberia where researchers from the East and West can again meet and engage in fruitful scientific dialogue. The book contains extended abstracts of the lectures and the poster presentations presented at the NATO ARW "Global Atmospheric Change and its Impact on Regional Air Quality" Irkutsk, Lake Baikal, Russian Federation, August 21-27, 2001. The ARW was composed of 22 oral presentations by key lecturers and 6 additional shorter oral presentations from participants. In a special poster session the 36 poster contributions were presented and discussed. Unfortunately not all contributors submitted extended abstracts, however, to compensate two contributions have been added from 2 participants who were originally invited but were unable to attend.
