**Learning and Teaching Around the World** Dec 03 2020 Learning and Teaching Around the World is a wide-ranging introduction to diverse experiences, practices and developments in global primary education. It explores different contexts for children's learning, and methods and purposes of primary education, in settings across Africa, Asia, Europe, the Americas and Australasia, and addresses wider issues such as the rise of refugee learners and large multi-grade classes. With an explicit focus on comparative and international studies and improving the knowledge, understanding and practice of

effective pedagogies for children's learning, this book reflects on key issues such as: Standards for learner-centred education  
Patterns of inclusion and exclusion Defining 'teacher professionalism' The impact of global education agendas Language  
policy for schooling and assessment Learning and Teaching Around the World is an essential text for those wishing to  
develop a critical understanding of the experiences of primary teachers and children around the world. Aimed at both  
undergraduate and postgraduate education studies students, the scope of this book will support all students in developing  
knowledge of primary education and of the diverse needs of learners in an era of global movement of children and families.

**Rural Education Across the World** Jan 16 2022 This book brings together authors from United States, South Africa,  
United Kingdom, China, Canada and Australia to provide insights and case studies from across a range of contexts to explore  
the interplay between the notions of rurality, innovation and education. The book reveals a hopeful and resilient approach to  
innovative rural education and scholarship collectively and provides important evidence to speak against an often deficit  
view of rural education. Three patterns are revealed, namely: the importance of place-attentive strategies, the importance of  
joined up alliances to maximise resources and networks and finally, the need to utilize alternative methodologies and  
frameworks that have a starting point of difference rather than deficit for any rural initiative or approach. By drawing from  
international examples and responding in innovative ways to rural education challenges, this book provides an opportunity to  
share international insights into innovations, interventions and partnerships that promote and support rural education in its  
broadest sense.

Beyond Education Feb 05 2021 A bold call to deromanticize education and reframe universities as terrains of struggle  
between alternative modes of studying and world-making Higher education is at an impasse. Black Lives Matter and  
#MeToo show that racism and sexism remain pervasive on campus, while student and faculty movements fight to reverse  
increased tuition, student debt, corporatization, and adjunctification. Commentators typically frame these issues as crises for  
an otherwise optimal mode of intellectual and professional development. In *Beyond Education*, Eli Meyerhoff instead sees  
this impasse as inherent to universities, as sites of intersecting political struggles over resources for studying. Meyerhoff  
argues that the predominant mode of study, education, is only one among many alternatives and that it must be  
deromanticized in order to recognize it as a colonial-capitalist institution. He traces how key elements of education—the  
vertical trajectory of individualized development, its role in preparing people to participate in governance through a  
pedagogical mode of accounting, and dichotomous figures of educational waste (the “dropout”) and value (the  
“graduate”)—emerged from histories of struggles in opposition to alternative modes of study bound up with different modes

of world-making. Through interviews with participants in contemporary university struggles and embedded research with an anarchist free university, *Beyond Education* paves new avenues for achieving the aims of an “alter-university” movement to put novel modes of study into practice. Taking inspiration from Black Lives Matter, Occupy Wall Street, and Indigenous resurgence projects, it charts a new course for movements within, against, and beyond the university as we know it.

World Yearbook of Education 2022 Feb 17 2022 The latest volume in the World Yearbook of Education Series explores the relationship between education and the globally prevalent principle of nationalism. This book identifies the diverse ways in which educational policies, discourses, curricula and pedagogy embed and promote the concept of "the nation" both historically and in the age of globalization. By challenging accounts owed to the discourse of "globalization" which conceal the presence of national epistemologies and interests in education, this book offers important insights into the role of education in making nationalism one of the most enduring and yet easily obscured forces of our time. Organized into four sections, this book looks at the following main issues: Historical (re)production of the nation considers how countries consider and reproduce their national identity and how this is built on their history. Hegemonic aspirations and interventions examines how instruction technologies developed during the Cold War have been propagated and disseminated around the world, how the development of educational policy based on the human capital theory emerged, and analyzes the extent to which tech companies are intent on establishing an imperial order of learning. Imperial policies and resurgences of nationalisms explores how global or imperial policies have been indulged in different parts of the world and how new forms of nationalism have been emerging. Paradoxes, inconsistencies, and a self-reflection focuses on nations acting imperially as sites of domestic injustices, addresses unresolved paradoxes between the global and the national and includes a historically informed critical review of the World Yearbooks of Education. Bringing together the voices of researchers from around the globe, *The World Yearbook of Education 2022* is ideal reading for anyone interested in learning how nationalism has affected the expansion of education systems and how its imperial aspirations are currently affecting education policy and practice.

**World Class** Jul 22 2022 “An upbeat chronicle of [Clavel’s] children’s school experiences in Hong Kong, Shanghai, and Tokyo...[offering] advice about vetting schools and enriching children’s education.” —Kirkus Reviews “An intriguing volume on the differences in global education.” —Library Journal A must-read firsthand exploration of why Asian students are outpacing their American counterparts and how to help our children excel in today’s competitive world. When Teru Clavel had young children, she watched her friends and fellow parents vie for spots in elite New York City schools. Instead

of losing herself in the intensive applications and interview process, Teru and her family moved to Asia, embarking on a decade-long journey through the public schools of Hong Kong, Shanghai, and Tokyo. These schools were low-tech and bare-bones, with teachers who demanded obedience and order. In Hong Kong, her children's school was nicknamed The Prison for its foreboding facilities, yet her three-year-old loved his teachers and his nightly homework. In Tokyo, the students were responsible for school chores, like preparing and serving school lunches. Yet Teru was amazed to discover that her children thrived in these academically competitive cultures; they learned to be independent, self-confident, resilient, and, above all, they developed a deep love of learning. When the family returned to the States, the true culture shock came when the top schools could no longer keep up with her children. Written with warmth and humor, *World Class* is a compelling story about how to inspire children to thrive academically. "Studded with lists of useful tips about choosing schools and hiring tutors, for parents who must advocate for their children and supplement gaps in their educations" (Publishers Weekly) and an insightful guide to set your children on a path towards lifelong success.

Introducing the World of Education: A Case Study Reader Aug 23 2022 The third of the series, Jane Hetherington's *Adventures in Detection*. Need to catch a conman real quick? Discover why a sister's become a stranger? Pick up a trail long gone cold? Catch an artful dodger red-handed? Make amends? Contact: [janeheteringtonprivatedetective@hotmail.com](mailto:janeheteringtonprivatedetective@hotmail.com)  
Contains: Magic, slapstick, the organic, a kleptomaniac, a cat and more than one mouse Doesn't contain any Grouse

**The Real World of College** Jun 28 2020 Why higher education in the United States has lost its way, and how universities and colleges can focus sharply on their core mission. For *The Real World of College*, Wendy Fischman and Howard Gardner analyzed in-depth interviews with more than 2,000 students, alumni, faculty, administrators, parents, trustees, and others, which were conducted at ten institutions ranging from highly selective liberal arts colleges to less-selective state schools. What they found challenged characterizations in the media: students are not preoccupied by political correctness, free speech, or even the cost of college. They are most concerned about their GPA and their resumes; they see jobs and earning potential as more important than learning. Many say they face mental health challenges, fear that they don't belong, and feel a deep sense of alienation. Given this daily reality for students, has higher education lost its way? Fischman and Gardner contend that US universities and colleges must focus sharply on their core educational mission. Fischman and Gardner, both recognized authorities on education and learning, argue that higher education in the United States has lost sight of its principal reason for existing: not vocational training, not the provision of campus amenities, but to increase what Fischman and Gardner call "higher education capital"—to help students think well and broadly, express themselves clearly, explore

new areas, and be open to possible transformations. Fischman and Gardner offer cogent recommendations for how every college can become a community of learners who are open to change as thinkers, citizens, and human beings.

*Education in a Violent World* Oct 21 2019 This book gives an immediate action plan for parents, teachers, school administrators, communities, school boards, first responders and school resource officers (school-based uniform police officers) to protect our kids in school.

Teaching in the Flat World Mar 06 2021 This book will help school systems improve their teacher workforce by drawing important lessons from nations with high-performing educational systems, as well as from successful state experiments in the United States. The authors examine common features and differences in the approaches of high-performing systems that made education a top priority and developed high-leverage strategies to meet their goals. Their varied solutions offer valuable ideas for how to create a strong teacher and school administrator corps from recruitment and preparation through induction, professional development, evaluation, and career advancement into leadership roles. Chapters focusing on systems in Finland, Ontario, and Singapore are coauthored by local scholars with extensive knowledge of the history and current status for policy and practice in their nation. A final chapter highlights attributes that are absolutely necessary for any education system to flourish. The book will be useful to policymakers, practitioners, and researchers interested in strengthening the quality of teaching.

*World Yearbook of Education 2013* Feb 23 2020 *Educators, professionalism and politics* offers ways of understanding how and with what consequences national systems of education and the work of education professionals are being reregulated in the context of contemporary global transitions. Globalization does not just create transnational organizations, relations and practices; it also transforms nation-states by creating more complex education spaces that impinge on the work of educators and the learning that they enable, globally, nationally and locally. This volume of the World Yearbook of Education focuses firmly on the educators themselves. It documents the way educators encounter and renegotiate ideas and practices that travel globally as they seek to enact their established professional projects. This framing recognises that educators' spaces, work and identities are historically anchored in national institutional trajectories, but are both disturbed and renewed as globally mobile ideas and practices "touch down" within national systems of education. The chapters examine the effect of global transitions on educators and education, and offers new perspectives on educational work in different parts of the world today. They challenge bleak assessments of teacher de-professionalization and idealistic narratives about professional development. Chapters highlight the significance of educators' occupational boundary work and the resources and networks they mobilize

through their professional projects as they make and remake education in national spaces. The volume tracks: Re-regulatory trajectories evident in national education spaces and their impact on educators; The way educators renegotiate globally mobile ideas, practices and national institutional trajectories, as they mediate global formations emerging in the national space; and The kinds of mediations and resources that enable education professionals to engage with the politics of professionalization. This volume of *The World Yearbook of Education* will be of great interest to Education researchers, graduate students, teacher educators and education policy-makers. Terri Seddon is Professor of Education at Monash University, Australia Jenny Ozga is Professor of the Sociology of Education at Oxford University, UK John Levin is Bank of America Professor of Education Leadership and Director, California Community College Collaborative, University of California, USA

The State of Global Education Dec 15 2021 A battle is being waged in classrooms and capitals around the world over the goals and objectives of the future of global education. While there is growing research in the area of global education, much remains to be uncovered, challenged, and learned through sound empirical research and conceptual explorations. What type of global citizens will schools promote? What types of policies, programs and instructional practices best promote effective global citizenship? Will global education curricula advance an unwavering loyalty to neoliberal ideologies and interests over the strengthening of human rights and the environmental health of our planet? This volume presents a series of research studies and innovative instructional practices centered on advancing global learning opportunities and literacies. The authors in this volume initiate a much needed conversation on ways students in multiple contexts can and should learn with the world and its people. Part I addresses global education in theory, with a particular focus on development, intercultural competence, and global citizenship. Part II addresses educational programs and practices that foster global learning and action to help build a better future for all citizens of our planet – including experiential education, university initiatives, and conceptual approaches to teaching and learning. This scholarship spans four continents in a multitude of educational contexts – primary, secondary, and tertiary - each with a focus on a different dimension of the possibilities and pitfalls in teaching about and with the world and its people.

**The World Book Encyclopedia** Nov 26 2022 An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

The World Bank and Education Mar 18 2022 World Bank and Education: Book Blurb For more than three decades, the World Bank has been proposing global policies for education. Presented as research-based, validated by experience, and

broadly applicable, these policies are ideologically driven, insensitive to local contexts, and treat education as independent of international dynamics and national and local economies and cultures. Target countries, needing resources and unable to generate comparable research, find it difficult to challenge World Bank recommendations. *The World Bank and Education: Critiques and Alternatives* represents a powerful challenge to World Bank proposals. Probing core issues—equity, quality, finance, privatization, teaching and learning, gender, and human rights—highlights the disabilities of neoliberal globalization. The authors demonstrate the ideological nature of the evidence marshaled by the World Bank and the accompanying policy advice. Addressing key education issues in developing countries, the authors’ analyses provide tools for resisting and rejecting generic policy prescriptions as well as alternative directions to consider. Robert Arove, in his preface, says, “whether the Bank is responsive to the critiques and alternatives brilliantly offered by the present authors, the book is certain to influence development and education scholars, policymakers, and practitioners around the globe.”

*World Yearbook of Education 2016* Jan 04 2021 This latest volume in the *World Yearbook of Education* series examines the global education industry both in OECD\* countries as well as developing countries, and presents the works of scholars based in different parts of the world who have significantly contributed to this area of research. Focusing on the areas of cross-over in public-private partnerships in education, *WYBE 2016* critically examines the actors and factors that have propelled the global rise of the education industry. Split into three key sections, Part I explores how education agendas are shaped; Part II considers the private financing of education and the export of school improvements to professional consultancies; and Part III analyses new market niches, such as low-fee private schooling and for-profit education provisions. The book draws upon case studies of many global organizations, including: The Bill and Melinda Gates Foundation Pearson Affordable Learning Fund Bridge International Academies Teach for All Omega Schools Co-edited by three internationally renowned scholars, Antoni Verger, Christopher Lubienski and Gita Steiner-Khamsi, *WYBE 2016* will be a valuable resource for researchers, graduates and policy makers who are interested in the global education industry. \*Convention on the Organisation for Economic Co-operation and Development.

***A World-class Education*** Jan 28 2023 Designed to promote conversation about how to educate students for a rapidly changing, innovation-based world, this comprehensive and illuminating book from international education expert Vivien Stewart focuses on understanding what the world’s best school systems are doing right for the purpose of identifying what U.S. schools—at the national, state, and local level—might do differently and better.

*World Yearbook of Education 2021* Jul 30 2020 Providing a comprehensive introduction to the topic of accountability and

datafication in the governance of education, the World Yearbook of Education 2021 considers global policy dynamics and policy enactment processes. Chapters pay particular attention to the role of international organizations and the private sector in the promotion of performance-based accountability (PBA) in different educational settings and at multiple policy scales. Organized into three sections, chapters cover: the global/local construction of accountability and datafication; global discourse and national translations of performance-based accountability policies; and enactments and effects of accountability and datafication, including controversies and critical issues. With carefully chosen international contributions from around the globe, the World Yearbook of Education 2021 is ideal reading for anyone interested in the future of accountability and datafication in the governance of education.

Education to Better Their World May 20 2022 In his most visionary book, internationally renowned educator Marc Prensky presents a compelling alternative to how and what we teach our children. Drawing on emerging world trends, he elaborates a comprehensive vision for K–12 education that includes new goals, new means, a new curriculum, a new kind of teaching, and a new use of technology. “Marc Prensky—one of the smartest people working in educational reform today—offers us a lucid, inspiring, optimistic, doable, and crucial blueprint for how we can build a future with the schools children desperately need in our modern, high-risk, highly complex, fast-changing, and imperiled world.” —James Paul Gee, Mary Lou Fulton Presidential Professor of Literacy Studies, Regents’ Professor, Arizona State University “Marc Prensky was always ahead of his time. Education to better their world continues this trend in spades. This book is a goldmine and a powerful wakeup call that the future is already here—in pockets right now but a harbinger of what is rapidly emerging. Read the book and make yourself part of the future today. As we are finding in our own work, students are agents of change—in pedagogy, in learning environments, and of society itself. Exciting possibilities await!” —Michael Fullan, Professor Emeritus, OISE/University of Toronto “Marc Prensky’s answer to the question ‘What is the purpose of education?’—that education should now empower youth to improve their communities and the world—would unleash the energy, creativity, and compassion of students and teachers in ways we have never imagined. We need the better world Prensky envisions and we need it now.” —Milton Chen, The George Lucas Educational Foundation “Prensky offers perhaps the most compelling case and model yet articulated by anyone for today’s globally-empowered children. A must-read book for all educators and anyone who cares about education.” —James Tracey, Head of School, Rocky Hill School, RI “Wow. As a takeaway it is good—very good.” —John Seeley Brown “A great book. Filled with ‘food for thought’, common sense, provocative ideas and fun to read.” —Nieves Segovia, Presidenta, Institucion Educativa SEK (SEK International Schools)

**Open World Learning** Aug 11 2021 This book provides state-of-the-art contemporary research insights into key applications and processes in open world learning. Open world learning seeks to understand access to education, structures, and the presence of dialogue and support systems. It explores how the application of open world and educational technologies can be used to create opportunities for open and high-quality education. Presenting ground-breaking research from an award winning Leverhulme doctoral training programme, the book provides several integrated and cohesive perspectives of the affordances and limitations of open world learning. The chapters feature a wide range of open world learning topics, ranging from theoretical and methodological discussions to empirical demonstrations of how open world learning can be effectively implemented, evaluated, and used to inform theory and practice. The book brings together a range of innovative uses of technology and practice in open world learning from 387,134 learners and educators learning and working in 136 unique learning contexts across the globe and considers the enablers and disablers of openness in learning, ethical and privacy implications, and how open world learning can be used to foster inclusive approaches to learning across educational sectors, disciplines and countries. The book is unique in exploring the complex, contradictory and multi-disciplinary nature of open world learning at an international level and will be of great interest to academics, researchers, professionals, and policy makers in the field of education technology, e-learning and digital education.

Global Education Jun 09 2021 Integrating global education into standards-based lessons allows students to connect personally with their peers across geographical boundaries, expand their knowledge and awareness of the world, and increase their interest and curiosity in what they are learning. Global Education is a guide to get you started. It provides an introduction to global networks such as iEarn, Global Schoolhouse, and ePals; an overview of Web 2.0 tools that support global learning, such as wikis, blogs, and podcasts; and hundreds of Web resources. No matter the grade level or subject area, Global Education's numerous examples, case studies, and lesson plans will provide you with ideas and inspiration for bringing your students the world.

*World Development Report 2018* Oct 13 2021 Every year, the World Bank's World Development Report (WDR) features a topic of central importance to global development. The 2018 WDR—LEARNING to Realize Education's Promise—is the first ever devoted entirely to education. And the time is right: education has long been critical to human welfare, but it is even more so in a time of rapid economic and social change. The best way to equip children and youth for the future is to make their learning the center of all efforts to promote education. The 2018 WDR explores four main themes: First, education's promise: education is a powerful instrument for eradicating poverty and promoting shared prosperity, but

fulfilling its potential requires better policies—both within and outside the education system. Second, the need to shine a light on learning: despite gains in access to education, recent learning assessments reveal that many young people around the world, especially those who are poor or marginalized, are leaving school unequipped with even the foundational skills they need for life. At the same time, internationally comparable learning assessments show that skills in many middle-income countries lag far behind what those countries aspire to. And too often these shortcomings are hidden—so as a first step to tackling this learning crisis, it is essential to shine a light on it by assessing student learning better. Third, how to make schools work for all learners: research on areas such as brain science, pedagogical innovations, and school management has identified interventions that promote learning by ensuring that learners are prepared, teachers are both skilled and motivated, and other inputs support the teacher-learner relationship. Fourth, how to make systems work for learning: achieving learning throughout an education system requires more than just scaling up effective interventions. Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress, building coalitions for learning, and taking an adaptive approach to reform.

*The Science of Education* Nov 02 2020

**Learning to be** Sep 24 2022

*World Perspectives in Education* Apr 19 2022 Originally published in 1962. In this book the main problems of contemporary education are illustrated with fresh material from many countries and assessed in a context of rapid change in technology, society, and politics. Familiar educational concerns are carefully considered; but the altered status of schools, teachers and homes in relation to competing influences receives particular attention. Recent reforms in the Soviet Union, and the development of education in Asia and Africa, are assessed vis-a-vis topical questions and proposals in Great Britain, the United States, and several Western European countries. The book is therefore useful both for 'problem' studies in comparative education, and for an up-to-date review of principles and practices in a critically formative period. It is also intended to present a study of education that will be widely educative and contribute to world understanding.

**The One World Schoolhouse** Jun 21 2022 A free, world-class education for anyone, anywhere. This is the goal of the Khan Academy, a passion project that grew from an ex-engineer and hedge funder's online tutoring sessions with his niece, who was struggling with algebra, into a worldwide phenomenon. Today millions of students, parents, and teachers use the Khan Academy's free videos and software, which have expanded to encompass nearly every conceivable subject; and Academy techniques are being employed with exciting results in a growing number of classrooms around the globe. Like many

innovators, Khan rethinks existing assumptions and imagines what education could be if freed from them. And his core idea—liberating teachers from lecturing and state-mandated calendars and opening up class time for truly human interaction—has become his life's passion. Schools seek his advice about connecting to students in a digital age, and people of all ages and backgrounds flock to the site to utilize this fresh approach to learning. In *THE ONE WORLD SCHOOLHOUSE*, Khan presents his radical vision for the future of education, as well as his own remarkable story, for the first time. In these pages, you will discover, among other things: How both students and teachers are being bound by a broken top-down model invented in Prussia two centuries ago Why technology will make classrooms more human and teachers more important How and why we can afford to pay educators the same as other professionals How we can bring creativity and true human interactivity back to learning Why we should be very optimistic about the future of learning. Parents and politicians routinely bemoan the state of our education system. Statistics suggest we've fallen behind the rest of the world in literacy, math, and sciences. With a shrewd reading of history, Khan explains how this crisis presented itself, and why a return to "mastery learning," abandoned in the twentieth century and ingeniously revived by tools like the Khan Academy, could offer the best opportunity to level the playing field, and to give all of our children a world-class education now. More than just a solution, *THE ONE WORLD SCHOOLHOUSE* serves as a call for free, universal, global education, and an explanation of how Khan's simple yet revolutionary thinking can help achieve this inspiring goal.

**The Teacher and the World** Apr 07 2021 Winner of the 2013 American Educational Studies Association's 2013 Critics Choice Award! Teachers the world over are seeking creative ways to respond to the problems and possibilities generated by globalization. Many of them work with children and youth from increasingly varied backgrounds, with diverse needs and capabilities. Others work with homogeneous populations and yet are aware that their students will encounter many cultural changes in their lifetimes. All struggle with the contemporary conditions of teaching: endless top-down measures to manipulate what they do, rapid economic turns and inequality in supportive resources that affect their lives and those of their students, a torrent of media stimuli that distract educational focus, and growth as well as shifts in population. In *The Teacher and the World*, David T. Hansen provides teachers with a way to reconstruct their philosophies of education in light of these conditions. He describes an orientation toward education that can help them to address both the challenges and opportunities thrown their way by a globalized world. Hansen builds his approach around cosmopolitanism, an ancient idea with an ever-present and ever-beautiful meaning for educators. The idea pivots around educating for what the author calls reflective openness to new people and new ideas, and reflective loyalty toward local values, interests, and commitments. The book

shows how this orientation applies to teachers at all levels of the system, from primary through university. Hansen deploys many examples to illustrate how its core value, a balance of reflective openness to the new and reflective loyalty to the known, can be cultivated while teaching different subjects in different kinds of settings. The author draws widely on the work of educators, scholars in the humanities and social sciences, novelists, artists, travellers and others from both the present and past, as well as from around the world. These diverse figures illuminate the promise in a cosmopolitan outlook on education in our time. In this pioneering book, Hansen has provided teachers, heads of school, teacher educators, researchers, and policy-makers a generative way to respond creatively to the pressure and the promise of a globalizing world.

**Education Around the World** Oct 25 2022 A concise comparative introduction to education in each major geographical region of the world and the major issues in international education today.

**Bring the World to the Child** Sep 12 2021 How, long before the advent of computers and the internet, educators used technology to help students become media-literate, future-ready, and world-minded citizens. Today, educators, technology leaders, and policy makers promote the importance of “global,” “wired,” and “multimodal” learning; efforts to teach young people to become engaged global citizens and skilled users of media often go hand in hand. But the use of technology to bring students into closer contact with the outside world did not begin with the first computer in a classroom. In this book, Katie Day Good traces the roots of the digital era's “connected learning” and “global classrooms” to the first half of the twentieth century, when educators adopted a range of media and materials—including lantern slides, bulletin boards, radios, and film projectors—as what she terms “technologies of global citizenship.” Good describes how progressive reformers in the early twentieth century made a case for deploying diverse media technologies in the classroom to promote cosmopolitanism and civic-minded learning. To “bring the world to the child,” these reformers praised not only new mechanical media—including stereoscopes, photography, and educational films—but also humbler forms of media, created by teachers and children, including scrapbooks, peace pageants, and pen pal correspondence. The goal was a “mediated cosmopolitanism,” teaching children to look outward onto a fast-changing world—and inward, at their own national greatness. Good argues that the public school system became a fraught site of global media reception, production, and exchange in American life, teaching children to engage with cultural differences while reinforcing hegemonic ideas about race, citizenship, and US-world relations.

*The New Education* Oct 01 2020 A leading educational thinker argues that the American university is stuck in the past -- and shows how we can revolutionize it for our era of constant change Our current system of higher education dates to the period

from 1865 to 1925. It was in those decades that the nation's new universities created grades and departments, majors and minors, all in an attempt to prepare young people for a world transformed by the telegraph and the Model T. As Cathy N. Davidson argues in *The New Education*, this approach to education is wholly unsuited to the era of the gig economy. From the Ivy League to community colleges, she introduces us to innovators who are remaking college for our own time by emphasizing student-centered learning that values creativity in the face of change above all. *The New Education* ultimately shows how we can teach students not only to survive but to thrive amid the challenges to come.

World Yearbook of Education 2020 Mar 26 2020 A timely contribution to the debate on educational governance and equality, the *World Yearbook of Education 2020* documents the significant changes that have occurred in the last 20 years reflecting a widespread shift from government to governance. Considering school context as well as specific school responses around the emergence of particular forms of governance, this book presents and contextualises a clear historical account of governance and accountability within schooling. Organised into three sections covering: Changing contexts of school governance; stakeholders and 'responsibilisation'; and radical governance, carefully chosen contributors provide global insights from around the world. They consider educational outcomes and closing the inequality gap and they document radical forms of governance, at local level, which have sought to create more equitable governance, intelligent accountability and greater involvement of key stakeholders such as students. Providing a series of provocations and reminders of the possibilities that remain open to us, the *World Yearbook of Education 2020* will be of interest to academics, professionals and policymakers in education and school governance, and any scholars who engage in historical studies of education and debates about educational governance and equality.

*The Flat World and Education* Mar 01 2023 Argues that the education system in America needs to make drastic changes in order to build a system of high-achieving and equitable schools that protects every child's right to learn.

*The World Is Flat [Further Updated and Expanded; Release 3.0]* Aug 31 2020 Explores globalization, its opportunities for individual empowerment, its achievements at lifting millions out of poverty, and its drawbacks--environmental, social, and political.

Genre in World Language Education Jul 10 2021 Ideal for methods and foundational courses in world languages education, this book presents a theoretically informed instructional framework for instruction and assessment of world languages. In line with ACTFL and CEFR standards, this volume brings together scholarship on contextualized, task-based performance assessment and instruction with a genre theory and pedagogy to walk through the steps of designing and implementing

effective genre-based instruction. Chapters feature step-by-step lesson designs, models of performance assessment, and a wealth of practical and research-based examples on how to make languages explicit to students through a focus on genre. Including sections on Arabic, French, Spanish, Italian, and other major world languages, this book demonstrates how to effectively teach and assess world languages in the classroom.

**Higher Education in a Globalising World** Dec 23 2019 This book contains research-based essays by established scholars from four continents. It analyzes the development of international policies in higher education and the impact of mutual observation and policy borrowing on national policies, and offers insights into recent changes and challenges for students, staff, and labour market relationships. It is for researchers, policymakers, managers in higher education, academic institutions, and government, as well as for academic staff.

**Third World Education** Nov 14 2021 This book debunks the argument that quality in education can only be achieved by limiting, or trading off, equality. The quality of schooling is a major issue for Third World nations across the globe. However there is no single measure which is universally accepted. Whether it is, as some economists might argue, an issue of the number of desks per classroom or one of national sovereignty is widely disputed. Defining equality in education becomes increasingly difficult in an era of globalization in which there exists a wide gap between rich and poor, both within and between nations. In the context of an international move towards New Right politics and neo-liberal economic ideologies, both the quality and equality of education are imperiled. This book argues that any worthy definition of quality education must include the interests and participation of the underprivileged.

*What Works in Girls' Education* May 08 2021 Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment *What Works in Girls' Education* is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or

journalist seeking to dive into the evidence and policies on girls' education.

**World-Centred Education** Dec 27 2022 This book makes an intervention in a long-standing discussion by arguing that education should be world-centred rather than child-centred or curriculum-centred. This is not just because education should provide students with the knowledge and skills to act effectively in the world, but is first and foremost because the world is the place where our existence as human beings takes place. In the seven chapters in this book Gert Biesta explores in detail what an existential orientation to education entails and why this should be an urgent concern for education today. He highlights the importance of teaching, not understood as the transmission of knowledge and skills but as an act of (re)directing the attention of students to the world, so that they may encounter what the world is asking from them. The book thus shows why teaching matters for education. It also highlights the unique position of the school as the place where the new generation is given the time to meet the world and meet themselves in relation to the world. The extent to which society is still willing to make this time available, is an important indicator of its democratic quality. This important text demonstrates, not only to academics, but also to students, teachers, school administrators, and teacher educators, the urgency of a world-centred orientation for education today.

*A Marxist Education* Jan 24 2020 *Dialectics of Education* is a rich collection of essays analyzing both the role of education in shaping ideology in the United States and the political implications of struggles for educational justice. This book seeks to recover and reframe the dialectical materialist tradition in critical education, studies and carries this tradition forward into theory and practice relevant for today. Building on the tradition of the groundbreaking book *Schooling in Capitalist America* that was first published in 1976, author Wayne Au presents a Marxist perspective on educational policies and pedagogy and the highlights the potential for struggle in both the political arena and the classroom. This book is an essential tool in the growing resistance against the privatization of education and for the struggle for educational rights for all students regardless of ethnicity or social status.

**Educational Technology and the New World of Persistent Learning** Nov 21 2019 Technologies, such as artificial intelligence and augmented and mixed reality, continue to be implemented to support the process of teaching and learning. However, technological advances and new applications should not be seen as a replacement for the requisite consideration of proper needs analysis, instructional design, and educational philosophy within courses or training; rather it should serve as an enabler to allow faster and more open access to learning for individuals. *Educational Technology and the New World of Persistent Learning* provides innovative insights into technology integration methods within classroom settings including

how they can empower students and how they can be used in the creation of dynamic learning experiences. The content within this publication examines e-learning, robotics, and tutoring systems and is designed for academicians, educators, principals, administrators, researchers, and students.

Transforming our World Through Design, Diversity and Education Apr 26 2020 Good design is enabling, and each and every one of us is a designer. Universal Design is widely recognized an important concept that should be incorporated in all person-centred policies. The United Nations Convention on the Rights of Persons with Disabilities (UNCRPD) clearly stipulates that the most effective way of delivering on the promise of an inclusive society is through a Universal Design approach. Sitting at the intersection of the fields of Higher Education and Universal Design, this book presents papers delivered at the Universal Design and Higher Education in Transformation Congress (UDHEIT2018), held in Dublin, Ireland, from 30 October to 2 November 2018. This event brings together key experts from industry, education, and government and non-government organization sectors to share experiences and knowledge with all participants. The 86 papers included here are grouped under 17 headings, or themes, ranging from education and digital learning through healthcare to engagement with industry and urban design. Celebrating and integrating all that is good in design, diversity and education, this book will be a valuable resource for all those interested in the inspiring and empowering developments in both Universal Design and higher education.

Cleverlands May 28 2020 As a teacher in an inner-city school, Lucy Crehan was exasperated with ever-changing government policy claiming to be based on lessons from ‘top-performing’ education systems. She resolved to find out what was really going on in the classrooms of countries whose teenagers ranked top in the world in reading, maths and science. Cleverlands documents Crehan’s journey around the world, weaving together her experiences with research on policy, history, psychology and culture to offer extensive new insights into what we can learn from these countries.
