Austral Dec 14 2021 The great geoengineering projects have failed. The world is still warming, sea levels are still rising, and the Antarctic Peninsula is home to Earth's newest nation, with life quickened by ecopoets spreading across valleys and fjords exposed by the retreat of the ice. Austral Morales Ferrado, a child of the last generation of ecopoets, is a husky: an edited person adapted to the unforgiving climate of the far south, feared and despised by most of its population. She's been a convict, a corrections officer in a labour camp, and consort to a criminal, and now, out of desperation, she has committed the kidnapping of the century. But before she can collect the ransom and make a new life elsewhere, she must find a place of safety amongst the peninsula's forests and icy plateaus, and evade a criminal gang that has its own plans for the teenage girl she's taken hostage. Blending the story of Austral's flight with the fractured history of her family and its role in the colonisation of Antarctica, Austral is a vivid portrayal of a treacherous new world created by climate change, and shaped by the betrayals and mistakes of the past. 'Paul McAuley's

balanced grasp of science and literature, always a rare attribute in the writer of prose fiction, is combined with the equally rare ability to look at today's problems and know which are really problems, and what can be done about them.' William Gibson

The Secret of Life Jul 29 2020 2026: Something is growing in the Pacific Ocean. "The Slick" appears to be a strange, fungus-like organism, but its DNA is unlike anything else on the planet. Rumours start to fly. Was life discovered deep beneath the Martian icecaps on a recent Chinese space mission? If it was, no-one is confirming it, but could that same life now be spreading through the ocean and threatening Earth's entire food chain? Brilliant scientist Dr. Mariella Anders is recruited to join an urgent NASA mission to Mars to see if she can uncover the truth of this organism, but this is no straightforward investigation. Corporate powers are committed to exploiting the secrets of the Slick for profit; radical eco-terrorists strike out against rampant genetic engineering; and a second Chinese mission to Mars at the same time has its goals shrouded in mystery. The secret of life on Earth and Mars might be found on the red planet, but who can Mariella

trust with the truth once it's found? And what price will she have to pay for it?

A Very British History May 07 2021

Jack Faust Mar 25 2020 An alternate-history reimagining of the Faust legend from the Nebula Award-winning author of *Stations of the Tide Taking* as his canvas the classic tale of the temptation of Faust—made famous by such literary luminaries as Goethe, Marlowe, and Mann—author Michael Swanwick paints a fresh vision of the dangers posed by the pursuit of knowledge. Set in Old World Germany, this tale of science and damnation begins with the great scholar Dr. Johannes Faust burning his books, having concluded that all his knowledge is nothing compared to the vast sea of ignorance surrounding him. Out of his despair, he inadvertently summons the tempter spirit, Mephistopheles, who is the projection of a dying alien race determined to make the destruction of humankind its final deed. Their weapon is knowledge—of science and technology, the mechanics of flight, the nature of the atom, and the secrets of economics. When, in an act of defiance, Faust nails the Periodic Table of the Elements to a church door in Wittenberg, he ushers in a golden age of prosperity for Germany that will make him the most powerful man in the world. But the love of the beautiful Margarete will be his downfall. What happens when the greed for knowledge and glory goes unchecked? Has a demon ever made a bad deal yet? Nominated for the Hugo Award, the Locus Award, and the British Science Fiction Award, *Jack Faust* is a masterful retelling of legend by one of science

fiction's finest craftsmen.

The city states of the moons of Jupiter and Saturn, founded by descendants of refugees from Earth's repressive regimes, the Outers, have fallen to the Three Powers Alliance of Greater Brazil, the European Union, and the Pacific Community. A century of enlightenment, rational utopianism and

exploration of new ways of being human has fallen dark. Outers are herded into prison camps and forced to collaborate in the systematic plundering of their great archives of scientific and technical knowledge, while Earth's forces loot their cities and settlements and ships, and plan a final solution to the 'Outer problem.' But Earth's victory is fragile, and riven by vicious internal politics. While seeking out and trying to anatomise the strange gardens abandoned in place by the Outers' greatest genius, Avernus, the gene wizard Sri Hong-Owen is embroiled in the plots and counterplots of the family that employs her. The diplomat Loc Ifrahim soon discovers that profiting from victory isn't as easy as he thought. And on Earth, in Greater Brazil, the democratic traditions preserved and elaborated by the Outers have infected a population eager to escape the tyranny of the great families who rule them. Meanwhile, in the outer reaches of the Solar System, a rag-taggle group of refugees struggle to preserve the last of the old ideals. And on Triton, fanatical members of a cabal prepare for a final battle that threatens to shatter the future of the human species. After a conflict fought to contain the expansionist, posthuman ambitions of the Outers, the future is as uncertain as ever. Only one thing is clear. No one can escape the consequences of war -- especially the victors.

The Quiet War Feb 28 2023 Twenty-third century Earth, ravaged by climate change, looks backwards to the holy ideal of a pre-industrial Eden. Political power has been grabbed by a few powerful families and their green saints. Millions of people are imprisoned in teeming cities; millions more labour on Pharaonic projects to rebuild ruined ecosystems. On the moons of Jupiter and Saturn, the Outers, descendants of refugees from Earth's repressive regimes, have constructed a wild variety of self-sufficient cities and settlements: scientific utopias crammed with exuberant creations of the

genetic arts; the last outposts of every kind of democratic tradition. The fragile detente between the Outer cities and the dynasties of Earth is threatened by the ambitions of the rising generation of Outers, who want to break free of their cosy, inward-looking pocket paradises, colonise the rest of the Solar System, and drive human evolution in a hundred new directions. On Earth, many demand pre-emptive action against the Outers before it's too late; others want to exploit the talents of their scientists and gene wizards. Amid campaigns for peace and reconciliation, political machinations, crude displays of military might, and espionage by cunningly wrought agents, the two branches of humanity edge towards war...

Twelve Tomorrows Aug 10 2021 Twelve visions of the future—by turns hilarious, frightening, and relevant—from new and established voices in science fiction. In this book, new and established voices in science fiction come together to offer original stories of the future. Ken Liu writes about a virtual currency that hijacks our empathy; Elizabeth Bear shows us a smart home tricked into kidnapping its owner; Clifford V. Johnson presents, in a graphic novella, the story of a computer scientist seeing a new side of the AIs she has invented; and J. M. Ledgard describes a 28,000-year-old AI who meditates on the nature of loneliness. We encounter metal-melting viruses, vegetable-based heart transplants, search-and-rescue drones, and semi-automated

sailing ships. Sometimes hilarious, sometimes frightening, and always relevant, *Twelve Tomorrows* offers compelling visions of potential futures. Originally launched in 2011 by MIT Technology Review, the *Twelve Tomorrows* series explores the future implications of emerging technologies through the lens of fiction. Featuring a diverse collection of authors, characters, and stories rooted in contemporary real-world science, each volume in the series offers conceivable and inclusive stories of the future, celebrating and continuing the genre of “hard” science fiction pioneered by authors such as Isaac Asimov, Arthur C. Clarke, and Robert Heinlein. *Twelve Tomorrows* is the first volume of the series to be published in partnership with the MIT Press. Contributors Elizabeth Bear, SL Huang, Clifford V. Johnson, J. M. Ledgard, Liu Cixin, Ken Liu, Paul McAuley, Nnedi Okorafor, Malka Older, Sarah Pinsker, Alastair Reynolds

The Forge of God Jan 03 2021 This doomsday masterpiece from the author of *Eon* and *Hull Zero Three* was a finalist for the Hugo and Nebula awards. On July 26, Arthur Gordon learns that Europa, the sixth moon of Jupiter, has disappeared. Not hiding, not turned black, but gone. On September 28th, Edward Shaw finds an error in the geological records of Death Valley. A cinder cone was left off the map. Could it be new? Or, stranger yet, could it be artificial? The answer may be lying beside it—a dying Guest who brings devastating news for Edward and for Planet Earth. As more

unexplained phenomena spring up around the globe—a granite mountain appearing in Australia, sounds emanating from the earth’s core, flashes of light among the asteroids—it becomes clear to some that the end is approaching, and there is nothing we can do. In *The Forge of God*, award-winning author Greg Bear describes the final days of the world on both a massive, scientific scale and in the everyday, emotional context of individual human lives. Facing the destruction of all they know, some people turn to God, others to their families, and a few turn to saviors promising escape from a planet being torn apart. Will they make it in time? And who gets left behind to experience the last moments of beauty and chaos on earth? Nominated for the Nebula, Hugo, and Locus Awards, *The Forge of God* is an engrossing read, breathtaking in its scope and in its detail.

Cowboy Angels Jul 09 2021 The first Turing gate, a mere hundred nanometers across, is forced open in 1963, at the high-energy physics laboratory in Brookhaven; three years later, the first man to travel to an alternate history takes his momentous step, and an empire is born. For fifteen years, the version of America that calls itself the Real has used its Turing gate technology to infiltrate a wide variety of alternate Americas, rebuilding those wrecked by nuclear war, fomenting revolutions and waging war to free others from communist or fascist rule, and establishing a Pan-American

Alliance. Then a nation exhausted by endless strife elects Jimmy Carter on a reconstruction and reconciliation ticket, the CIA's covert operations are wound down, and the Real begins to wage peace rather than war. But some people believe that it is the Real's manifest destiny to impose its idea of truth, justice, and the American way in every known alternate history, and they're prepared to do anything to reverse Carter's peacenik doctrine. When Adam Stone, a former CIA field officer, one of the Cowboy Angels who worked covertly in other histories, volunteers for reactivation after an old friend begins a killing spree across alternate histories, his mission uncovers a startling secret about the operation of the Turing gates and leads him into the heart of an audacious conspiracy to change the history of every America in the multiverse—including our own. This book is a vivid, helter-skelter thriller in which one version of America discovers the true cost of empire building, and one man discovers that an individual really can make a difference. From the Trade Paperback edition.
