The first edition of *The Action Research Dissertation: A Guide for Students and Faculty* was a first-of-its-kind reference, distilling the authors' decades of action research experience into a handy guide for graduate students. The Second Edition continues to provide an accessible roadmap that honors the complexity of action research, while providing an overview of how action research is defined, its traditions and history, and the rationale for using it. Authors Kathryn Herr and Gary L. Anderson demonstrate that action research is not only appropriate for a dissertation, but also is a deeply rewarding experience for both the researcher and participants. This practical book demonstrates how action research dissertations are different from more traditional dissertations and prepares students and their committees for the unique dilemmas they may face, such as validity, positionality, design, write-up, ethics, and dissertation defense.

Despite modern technology and the focus on international business striving to make the world a smaller place, many organizations still struggle with the need for diversity and multiculturalism. This issue is also present in academia, as women of color and those previously perceived to be in the ethnic minority continue the journey to become the educators and leaders that universities need.
