The essential and Comprehensive Step-by-Step Guide to Obtaining Italian Dual Citizenship by descent.* *Citizenship 2.0* focuses on an important yet overlooked dimension of globalization: the steady rise in the legitimacy and prevalence of dual citizenship. Demand for dual citizenship is particularly high in Latin America and Eastern Europe, where more than three million people have obtained a second citizenship from EU countries or the United States. Most citizenship seekers acquire EU citizenship by drawing on their ancestry or ethnic origin; others secure U.S. citizenship for their children by strategically planning their place of birth. Their aim is to gain a second, compensatory citizenship that would provide superior travel freedom, broader opportunities, an insurance policy, and even a status symbol. Drawing on extensive interviews and fieldwork, Yossi Harpaz analyzes three cases: Israelis who acquire citizenship from European-origin countries such as Germany or Poland; Hungarian-speaking citizens of Serbia who obtain a second citizenship from Hungary (and, through it, EU citizenship); and Mexicans who give birth in the United States to secure American citizenship for their children. Harpaz reveals the growth of instrumental attitudes toward citizenship: individuals worldwide increasingly view nationality as rank within a global hierarchy rather than as a sanctified symbol of a unique national identity. *Citizenship 2.0* sheds light on a fascinating phenomenon that is expected to have a growing impact on national identity, immigration, and economic inequality. Americans are able to keep their U.S. citizenship and obtain citizenship from a select number of other countries. Italy is one of them. If you are a direct descendant of an Italian then you may be

eligible to apply for citizenship via *jure sanguinis*, which is Latin for “right of blood”. In an age of terrorism and securitized immigration, dual citizenship is of central theoretical and political concern. The contributors to this timely volume examine policies regarding dual citizenship across Europe, covering a wide spectrum of countries. The case studies explore the negotiated character and boundaries of political membership and the fundamental beliefs and arguments within distinct political cultures and institutional settings which have shaped debates and policies on citizenship. The analyses explore the similarities and differences in the politics of dual citizenship, to identify the dominant terms of public debates within and across selected immigration and emigration states in Europe. The research demonstrates that policies on dual citizenship are not simply explained by different concepts of nationhood. Instead, concepts of societal integration, which may well be contested in a given polity, are extremely influential.
